In order to assist you in the planning and installation of your new Miata parts and accessories, we have provided the installation difficulty for most products throughout our catalog.

Installation Difficulty: ① SIMPLE ② DO-ABLE ③ INVOLVED ④ INTENSE

Working on automobiles is inherently dangerous. Moss Motors Ltd. is not liable for injury or damage due to incorrect installation or use of their products. All products are sold with the understanding that the safe and proper installation and use of the products is the customer's responsibility. Follow factory workshop manual procedures and instructions, but use current shop safety standards and common sense. Some tasks will require professional advice or services which Moss Motors cannot provide.

Miata and Mazda are registered trademarks of the Mazda Corporation. This Miata catalog and miatamania.com are not affiliated with Mazda Corporation.

Moss Motors

...your #1 source for
Miata accessories.

It has been 26 years since we opened our first East Coast warehouse in New Jersey. Some young kid - yours truly - was packed up with a handful of parts and shipped off to test the waters of two-coast distribution. The experiment worked out; so well in fact we have been forced to find bigger quarters. Make that much bigger quarters.

After a great deal of research, and several trips up and down the Eastern seaboard, we have settled on a location outside Richmond, Virginia. With over 100,000 square feet, and room to almost double that existing footprint, we will be in a position to provide much improved service to customers east of the Mississippi. The center won't be in full operation until the end of the year, but you should see faster delivery of the entire Moss product line as we come up to speed in early 2009.

We're not just making a physical move, we are moving into a new Classic British product line as well. If you, or anyone you know drives a classic Mini, make sure you order up a copy of the Moss Motors Classic Mini Catalog. It has thousands of listings covering Minis from day one to the end of production.

Moss Motors may be celebrating our 60th anniversary year, but we're feeling anything but complacent.

Happy Motoring,
Robert Goldman

Sway Bars by H&R

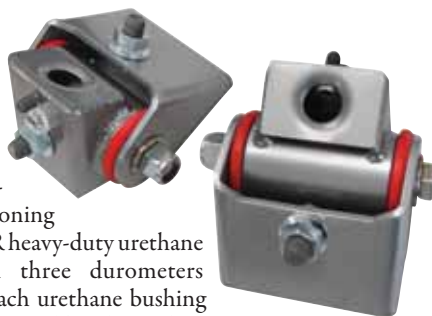

Sway Bars are a great place to start when considering suspension upgrades. H&R Sway Bars are crafted from special spring steel that is both stronger and more resilient than most competitors' sway bars. All H&R Sway Bars are built on specialized machines designed by H&R – the only way to ensure an exact fit and incomparable performance in every application. Each bar is heat-treated and shot-peened for increased surface hardness and life. Finally, all H&R Sway Bars are powder coated for long lasting performance, quality and beauty. 100% made in Germany to exacting ISO 9001 and TÜV Certification standards, guaranteeing the highest quality and best performance. H&R Sway Bar kits include exclusive sway bar bushings featuring a special Urethane/Teflon composite that eliminates the need for lubrication and prevents squeaks. No mess, no maintenance, perfect fit. 2

Appl	Description	Part#	Price
06-08	Front	920-335	\$219.95
06-08	Rear	920-336	169.95

Urethane Engine Mounts

Stop power robbing drive-train rocking when transitioning from gas-on to gas-off. AWR heavy-duty urethane engine mounts come in three durometers depending on your need. Each urethane bushing is encased in a silver powdercoated bracket to keep your engine stable. Now you can put the power to the ground instead of into rocking your engine. 3

Appl	Description	Part#	Price

High Flow Catalytic Converter

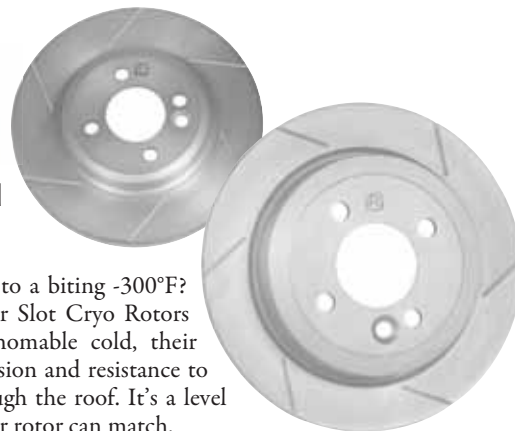

MagnaFlow's high flow cat is the converter of choice when it is time to replace your factory unit. All stainless steel construction from tip-to-tip. MagnaFlow converters have a ribbed body that minimizes expansion and distortion when the converter heats up. The ribs form a channel that protects the cushioning mat from direct exposure to exhaust gasses and holds the ceramic catalyst in proper alignment. For protection an OEM style ribbed heat shield is incorporated. MagnaFlow's ceramic honeycomb is designed for optimum CFM flow and maximum durability. Not CARB approved. 2

Cryo-Treated Rotors by Powerslot

Why freeze rotors to a biting -300°F? By dropping Power Slot Cryo Rotors to such an unfathomable cold, their strength under tension and resistance to warping goes through the roof. It's a level of strength no other rotor can match.

- Power Slot Cryo Rotors are cycled between -300°F and 300°F three times for the maximum strengthening effect
- Cryogenically treated to a blistering -300°F for extreme tension strength and total warping resistance
- Lasts up to 33% longer than standard rotors to keep your vehicle on the road and off the lift
- Power Slot Cryo Rotors boast exclusive Vac-U-Slot vents that keep your brakes cool under pressure and dry in the elements
- Finished with a military-grade cadmium coating that last 60% longer than standard zinc coats
- Your Power Slot Cryo Rotors are backed by a 3-year, 36,000-mile warranty
- Sold individually

Engine Brace

MX-5 Cup racers have found problems with engines and transmissions twisting from high G loads while cornering. Adding this brace stabilizes the engine and prevents heavy G loads from affecting the transmission. Mounts to both the right front shock tower and the right front side of the head of the engine. Nickel-plated adjusters with black powdercoated bar and mounts will look great in your engine bay. Available with polyurethane bushings for street cars, or solid mounts for MX-5 Cup cars, autocross or other track cars. 2

06-08	Solid Mounts	907-176	199.95 d

Direct ship orders are shipped right from the manufacturer. The manufacturer will receive your order within 24-48 hours and most items ship within 5 working days. While shipping times are slightly longer, by not stocking these items we can offer lower prices. Orders must be paid in advance by charge card or certified check. Actual shipping charges apply. Direct ship orders do not qualify for free shipping.

*See ordering page for details

Clear View Wind Blocker by Cobalt®

Fall in love with your MX-5 all over again. Wind buffeting might have been a funny little quirk when you purchased your car but as time goes on it makes for a less than ideal driving experience. The Cobalt Clear View wind blocker literally blocks the wind and forces it over the rear of the car. Its sleek shape matches the lines and contours of the MX-5. Water jet cut from 1/4" Lexan and features the Roadster logo. 1

Appl	Description	Part#	Price
06-08	Wind Blocker	904-130	\$189.95

Polished Grille

Give your MX-5 a more aggressive look with our billet slat grille. Slat are CNC machined from 6061 T6 aluminum for a perfect fit, and is then polished for a long lasting finish. Specifically designed to be strong yet allow maximum airflow to your radiator. 3

Appl	Description	Part#	Price
06-08	Replacement Grille	903-676	\$109.95

Mazda Key Blanks

It is always prudent to carry a spare key in your wallet, purse or in one of those magnetic doodads that attaches to a secret place on your Miata. However, finding a replacement key blank to have cut can be difficult. We now stock a variety of factory key blanks for your Miata.

License Plate Window

Factory All-Weather Cover

The culmination of over a decade of material engineering, it has only recently been possible to manufacture the microscopic yarns which go into this advanced micro-fiber cover material. Only one textile mill in the world was able to meet the specification - the results are truly a triumph for car cover users! Stormproof is uncoated and untreated, this means that even after months or years of use, it will retain the same properties as the day you purchased it! Stormproof has tested to be the most water resistant and (because there are no coatings) the most breathable car cover material you can buy. Cover features the MX-5 logo.

Appl	Description	Part#	Price
06-08	Stormproof w/MX-5 Logo	906-226	\$219.95

Factory Indoor Cover

Lightweight, soft-backed, Satin Snugfit material stretches to the shape of your MX-5 like a glove providing indoor protection and a tidy fit. Includes MX-5 logo and matching storage bag.

Appl	Description	Part#	Price
06-08	Satin Snugfit w/MX-5 Logo	906-225	\$179.95

Hard Top Storage Bag

Most damage to hard tops is done while they are off the car, and "safely" stored away. Upgrade your hard top storage solution to this hard top storage bag. The heavy weight nylon bag is velvet lined and padded to protect your hard top from any unforeseen hazards. Zippers on both sides make enclosing your hard top convenient and the sturdy "D" rings allow you to hang it on the wall out of the way. The bag is specially shaped to support the hardtop safely for extended periods with no risk of damage or distortion.

Appl	Description	Part#	Price
90-08	Hard Top Bag	916-245	\$169.95

MazdaSpeed Mug

Generous 13 oz. mug sports the famous MazdaSpeed logo.

Fire Extinguisher & Accessories

HalGuard™ clean agent extinguishers are UL listed and rated and EPA approved. A "Clean Agent" is an electrically non-conducting, liquid or gaseous fire extinguishing agent that DOES NOT leave a harmful residue or impair vision. Clean agents have long been the product of choice for protecting classic automobiles and race cars as well as aircraft, computer rooms and other high tech equipment.

Quick Release Clamp System – What good is a fire extinguisher if you have to keep it in your trunk or buried under the seat to keep it from rolling around. A fire extinguisher is only of use if it is within easy reach at all times. Insure your extinguisher is right where you need it with these handy clamps. The band clamp goes around the extinguisher itself. The flat clamp mounts to any flat surface while the round clamp mounts to any 1 3/4" roll bar. The band clamp attaches to either mounting clamp with a IHRA approved quick release for easy access.

Appl	Description	Part#	Price
90-08	HalGuard™ Extinguisher	220-383	\$168.95
90-08	Band Clamp	905-916	89.95

90-08	1 3/4" Round Clamp	905-918	49.95

LED Safety Lights

LED safety lights install anywhere that you need a little extra light. The bottom of your doors, in the cargo area, glove box, or footwell, the uses are endless. The simple two wire hook up easily connects to your door light or dome light. Open the door and your lights turn on. Extra long life 20,000 hour bulbs insure you will never have to replace them. Proprietary installation method is quick and non-invasive. Sold as a pair. 2

Appl	Description	Part#	Price
90-08	Safety Lights	102-765	\$29.95

System Features:

PowerCard Pro

PowerCard Pro is a load-based tuning solution combining the power of an ultra fast microprocessor and self-diagnostics. Under normal driving conditions PowerCard waits patiently offline, but mash the throttle and PowerCard instantly steps up the fuel necessary for boost. The PowerCard Pro gives the user the ability to finely adjust fuel, if desired, in the three key areas of Cruise, Mild acceleration and Full throttle. This fine level of adjustment will allow you to tailor the fuel specifically to your Miata's set up.

Newly Designed Belt Tensioner

Our newly engineered belt tensioner has better geometry and more range of adjustment. The base plate is $\frac{3}{8}$ " thick aluminum to eliminate flexing and belt movement. The all new idler pulleys are designed with a crown. The crowned design causes the drive belt to track in the center of the pulley, not to one side or the other. To upgrade your JR M45 supercharger to our new MP62 design, please see page 10.

PowerCard Timing Controller

Proactive timing retard is the safest method of avoiding detonation under boost.

Timing Controller marries RPM-based control with precise timing retard. Timing Controller has 3 modes corresponding to the three RPM ranges – Low (Green), Mid (Yellow) and High (Red). In each mode from 0 to 15 degrees of timing retard can be programmed by simply pushing the + or – button.

Go to miatamania.com to read more.

Moss Motors MP62 Supercharger System

Miata power fanatics can rejoice, "IT" has arrived. Moss Motors' MP62 based supercharger system was designed for the Miata enthusiast that wants to make serious horsepower and torque with plenty of room available for significant upgrades in power.

Stage 2 System - The entire system is designed around the Eaton MP62 Supercharger. The MP62 is a roots-type positive displacement blower that delivers 6-7 psi of instant boost at any RPM. Integrated into the MP62 supercharger is a boost bypass valve. When cruising, the bypass valve opens and re-circulates the air. This allows for fuel economy similar to stock. Put the hammer down and the bypass valve shuts immediately delivering instant boost to your Miata's engine. Every part in this system, including the Eaton supercharger, is warranted by Moss Motors for two years from the date of purchase.

Fuel enrichment under boost is provided by the PowerCard Pro. Moss Motors and Dobeck Performance have spent the last several years working together to create the most compact and powerful – PowerCard Pro. The philosophy is simple, work in harmony with the factory ECU and simply add fuel where necessary only under boost. This philosophy will quickly become apparent the first time you drive your newly MP62 supercharged Miata. Instant boost, seamless power and no driveability quirks. A steady idle and nothing but a smooth delivery of boosted power that only the PC Pro can deliver. Another great PC Pro feature is real time fuel curve manipulation. Vast adjustment is available by simply targeting the appropriate zone and making a few clicks on the easy to use push button interface.

Stage 1 System - If you need more power out of your Miata and emissions are a concern, then our CARB approved Stage 1 system is just what you need. All the features and engineering as our Stage 2 system but running 5-6 psi of boost. The Stage 1 System includes everything you get in our Stage 2 system however we are required to supply a non-adjustable PowerCard Fuel Controller and Timing Control.

Stage 2 System

MP62 High Flow Outlet Manifold

BRP Supercharger owners get an extra 10 HP! Our new high flow outlet manifold underwent hours of design and flow testing. Our engineers needed to find the right balance of volume and air speed and as you can see by the dyno, we were successful. Comparing our manifold to the BR Performance manifold, our Miata gained 10 HP. Upgrade your old BR manifold to our Moss manifold today, it is a direct replacement.

BOOST UPGRADES

The Jackson Racing boost upgrade gives your supercharged Miata a healthy shot of adrenaline! By spinning the supercharger faster, boost pressure is increased. The result is up to a 15% increase in horsepower and torque!

99-05 Boost Upgrades

The system includes a smaller blower pulley, PowerCard Pro adjustable fuel controller, PowerCard's adjustable Timing Controller, hardware and instructions. Upgrade requires the use of our latest belt tensioner which has been available separately and included in systems since March 2007. If you are running a system that has the old style tensioner than purchase the upgrade that includes the new belt tensioner. Belt sold separately.

SUPERCHARGERS

Why have OEM manufacturers such as Ford, GM, Jaguar and Mercedes Benz turned to supercharging? Instant, reliable power! Imagine your Miata passing simply by rolling on the throttle...no downshifting. Climb a hill in 5th gear instead of 3rd. Leave a stoplight completely sideways burning rubber. It's all possible with the Jackson Racing Supercharger system.

The core of the Miata supercharger system is a roots type Eaton MP45 supercharger; utilizing the same patented technology that the big OEMs use in their supercharged vehicles. By incorporating a vacuum bypass system, air is directed around the supercharger while cruising; excellent reliability and fuel economy are retained. When you need power, simply stand on the throttle and the bypass valve closes, instantly pressurizing your engine's intake system.

The Supercharger is only one part of the equation. To achieve a smooth rush of power and excellent driveability, proper tuning is essential. All 90-05 Jackson Racing Supercharger Systems use PowerCard as their fuel management solution. PowerCard is a load-based tuning solution that combines the latest in microprocessor technology and self-diagnostics. Under normal conditions PowerCard waits patiently off-line, but accelerate aggressively and PowerCard instantly steps up the fuel necessary for boost. Using an ultra-fast microprocessor that reacts just as quickly as your factory ECM, your Miata drives just as Mazda intended, whether in boost or not. Factory strut tower brace will have to be removed for Supercharger installation. 4

Upgraded Supercharger Tensioner for JR M45

Moss Motors has developed a new style tensioner for JR M45 supercharged Miatas and it is now standard in all systems. This new tensioner assembly eliminates belt slipping issues by allowing for more adjustment, especially useful on higher boost systems. Belt now runs in the center of the idler pulleys and not to one edge or the other. Belt changes are simpler and less time consuming. Includes two new idler pulleys as well. Power steering is required for new belt tensioner. Must purchase belt separately. 1

Year	Description	Part#	Price
90-05	Upgraded Tensioner	999-820	\$199.95

High Flow Fuel Pump

When you make more power, you need more fuel. There are plenty of generic pumps out there, but only the JR high-output fuel pump has been specified to deliver the correct amount of fuel. Manufactured by an OEM vendor, our pump is a direct, in tank, replacement. If you are installing a supercharger, we highly suggest replacing your stock fuel pump at the same time. 2

Appl	Description	Part#	Price
90-97	Fuel Pump	989-206	\$159.95

MSD Boost Timing Unit

Running advanced timing on boosted applications is risky, but by installing an MSD Boost Timer base timing can remain stock. Once under boost the MSD unit retards timing 2 degrees per pound of boost to a maximum of 6 degrees giving your Miata good bottom and transition power all while keeping it safe. 2

Appl	Description	Part#	Price
90-97	MSD Booster Timer	999-120	\$129.95

Washer Bottle Relocation Kit

This system is designed for those of you supercharging late model non-U.S. spec Miatas and 99-05 Miatas with ABS. This system relocates the washer bottle to the passenger side of the engine compartment.

Appl	Description	Part#	Price
99-05	Relocation Kit	902-490	\$42.95

Adjustable Timing Controller

The JR timing controller is specifically designed for your supercharged Miata. This unit has an extensive list of features, which make it the best timing controller available. 2

- Base timing curve optimized specifically for the Miata. Hundreds of hours on the dyno were needed to dissect and then remap the perfect timing curve. The timing curve is three-dimensional. It looks at RPM, Boost, and Timing. It only retards timing where necessary and timing is advanced wherever possible.
- Only the highest quality industrial and automotive grade components are used.
- All circuitry is encapsulated to provide superior protection against moisture, vibration and shock.
- Circuitry has built in safeguards against incorrect installation, improper jump starting and sudden electrical failure.
- Adjustable timing curve – allows up to 2 degrees of retard per pound of boost. Adjustment is incredibly accurate using our in-cockpit adjuster. The knob has detents, which allow you to accurately make changes or return to exactly where you started. Each click of the knob is one tenth of a degree of retard.
- Unit is pre-calibrated to provide excellent cold starting capabilities.
- 2 year unlimited mileage warranty.

Appl	Description	Part#	Price
90-97	JR Boost Timing Control Unit	999-490	\$369.95
99-00	JR Boost Timing Control Unit	999-495	329.95

Supercharger Idler Pulleys

Take it up a notch with these high quality idler pulleys. Manufactured from durable, high grade Dupont 800 series nylon with a Dupont/Corning fiberglass fill for added strength, they can handle a dynamic load rating of 1530 lbs. These pulleys use top quality NSK bearings rated to withstand 24,000 RPM continuous use for 2500 hours. The last idler pulleys you should ever need.

Air-to-Air Intercooler System by Track Dog Racing™

There is a myth that superchargers can't use Air-to-Air intercoolers since they can't offset pressure losses due to piping and intercooler volume. However, superchargers have the advantage of providing instant boost and increase boost as the RPM increases. Pressure drop is negligible and the substantial cooling benefit of an Air-to-Air intercooler offsets any losses in boost levels by allowing your supercharger to work more efficiently. With cooler, denser intake air, timing retarding is reduced, producing even more horsepower. Since forced induction by nature produces extra heat, efficient cooling is critical to ensure maximum performance. 3

- Some features and benefits:
- Highest Quality Components
- All Aluminum Core - 16"W x 8"H x 3"D
- 304 Stainless Steel Piping - Brushed Finish
- Powdercoated Aluminum Radiator Cover
- Three-ply silicon hoses
- Extremely Efficient
- Designed for the least amount of pressure drop
- Plastic panels that enlarge the radiator shroud area
- Cooler air reduces chances of detonation
- More timing (less retard) can be added, producing more horsepower
- More boost can be safely added
- Typical efficiency about 80-85%†
- No maintenance
- Simple installation

† Efficiency based on (Air exiting the compressor minus air exiting the intercooler) divided by (Air exiting the compressor minus ambient air). Example of Air-to-Air: 300F - 115F / 300F - 80F = .84 = 84% efficiency. Example of W/A: 250F - 180F / 250F - 80F = .41 = 41% efficiency.

Cold Air Intake for JR Supercharger

The original air filter on the JR Supercharger pulls in hot air from the exhaust header area, which can be up to 50 degrees hotter than ambient. By replacing the stock filter set up with an enclosed cold-air filter system, intake temperatures are near ambient, increasing horsepower and lowering the detonation threshold. A stainless steel cover directs cool air from behind the driver's headlight into the filter. At speed, the intake's system is pressurized letting your supercharger take an even a bigger gulp of cool air. It takes only a few seconds to remove the filter for routine cleaning. Cruise control equipped Miatas will need to relocate the cruise control actuator. 2

Appl	Description	Part#	Price
90-93	Cold Air Intake	904-395	\$189.95
94-97	Cold Air Intake	904-396	189.95

BETTER

Typhoon™ Air Intake System from K&N

The Typhoon™ air intake system is a free flowing mandrel bent aluminum tube induction system that replaces the restrictive factory air filter and housing on your Miata. More airflow translates into an extra 3.7 HP at 6500 RPM! And the K&N filter is washable and reusable, and carries a million mile warranty. CARB approved. 1

Appl	Description	Part#	Price
99-05	Polished	904-370	\$189.95
99-05	Red	904-371	189.95

K&N 57i Series Induction Kits **BETTER**

K&N 57i series induction kits replaces your Miata's restrictive stock air box with a large open-air style filter. The extra surface area provides more airflow and captures more dirt, increasing its service life before a cleaning is needed, up to 100,000 miles. Not CARB approved. 1

Appl	Description	Part#	Price
90-93	57i Intake	904-373	\$109.95
94-97	57i Intake	904-372	129.95

06-08	57i Intake	904-880	199.95

Intake Kits **BETTER**

Designed to flow more air than your stock Miata airbox, these systems add a healthy dose of horsepower while dressing up the engine bay. Both units come complete with all hardware and assembly instructions. CARB approved. 1

Appl	Description	Part#	Price
94-97	Intake Kit, Black	904-255	\$209.95
99-05	Intake Kit, Polished	901-999	219.95

Stage 2 Intake System **BEST**

The Stage 2 fully enclosed cold air intake for the naturally aspirated Miata replaces your stock restrictive air box and crossover tube with a beautiful stainless steel fully enclosed intake. The system includes a T304 stainless steel crossover tube and K&N filter and all hardware. The Stage 2 is an easy install with a big reward! You can feel the power right away. 2

Appl	Description	Part#	Price
99-05	Stage 2 Fully Enclosed	904-365	\$354.95

Cold Air Intake by MazdaSpeed **BETTER**

Bring cold air from outside the engine compartment into the engine through mandrel bent, 2.5" diameter, polished and powdercoated aluminum tubing. The intake system is designed for improved engine breathing, while re-using the stock MAF sensor. Kit includes washable and reusable conical filter. CARB approved. 3

Year	Description	Part#	Price
06-08	Air Intake	904-375	\$359.95

Ram Air Intake by Jackson Racing **BEST**

The Jackson Racing Cold Air Intake allows your car to breathe clean, cool air for maximum horsepower, up to 14 HP in most cases. Instead of adding one of those unsightly hoods that you can barely see over, the JR Cold Air Intake system tucks neatly under the hood. A strategically placed scoop brings cold air into the throttle body with increased velocity. The combination of cool air and pressurized air (at speed) will increase your horsepower. Each system includes a high-velocity air filter for increased airflow and filtration. 2

Appl	Description	Part#	Price

Performance Intake with Heat Shield **GOOD**

Replaces your Miata's restrictive air box with a beautiful stainless steel heat shield and free flowing foam filter. It is a simple way to add a nice growl to your Miata and gives you some stylish under hood looks! Keep the engine heat away from your air intake—cooler air means more power. Will not fit ABS equipped cars without relocating the washer bottle. 2

Appl	Description	Part#	Price
90-93	Intake w/Heat Shield	905-880	\$99.95

NEW!

Cold Air Induction by Cobalt® **BEST**

The first cold air intake for the MX-5 that doesn't require you to remove the bumper cover every time you need to clean or replace the filter. Our Cobalt intake uses a precisely placed scoop, just behind the grille, to direct pressurized air into the engine. The incoming cool air is pushed through the intake to the engine, increasing HP and TQ output. This intake has been strategically placed so if you have to run a front license plate, the scoop is below and behind it so air flow will not be affected. For even more power output, replace the stock paper air filter with a high flow K&N cotton gauze filter. The K&N filter is a direct replacement and is backed by K&N's million mile warranty. Not CARB approved. 3

Appl	Description	Part#	Price
06-08	Cold Air Induction	904-377	\$74.95
06-08	K&N Filter	903-795	39.95

Turn Signal Air Intake

This set replaces your stock turn signal and supplies cool air to the engine compartment. The molded urethane scoop incorporates a turn/park lamp assembly that gives your Miata an aggressive look. Comes paint ready with easy to read instructions. 1

Appl	Description	Part#	Price
90-97	Turn Signal Intakes	903-200	\$124.95

Apollo Air Induction by K&N **BETTER**

K&N Apollo cold air Induction systems incorporate a washable/reusable K&N high flow air filter within a protective shell. They come with custom mounting hardware to fit your Miata/MX-5. The Apollo's shell reduces heat build-up and uses the stock forced cold air system to feed cool air into your engine, resulting in improved volumetric efficiency and increased power gains. Apollo cold air induction systems allow for updating your vehicle's intake system while retaining a closed environment. Not CARB approved. 3

Performance Plug Wires by Jackson Racing

Use the same high quality performance plug wires as many of the top NASCAR Nextel Cup teams! Made exclusively for Jackson Racing, our wires incorporate the JR Logo and script. Check out the extensive list of features:

- Outer sheath made from 8 mm silicone which resists high temperatures and chemicals
- Fiberglass Braid provides superior pull strength
- EPDM layer provides superior insulation to "silicone over silicone" wires
- Polymer Conductive coating protect conductor for better contact
- Monel Conductor for maximum conductivity
- Ferrite impregnated core for superior EMI suppression
- Aramid fibers for superior tensile strength

Performance Ignition System

Modified Miatas running forced induction or higher compression require an ignition system that can handle the increased ignition demand and deliver a proper and consistent spark. Our upgraded ignition coil delivers an amazing 45K volts, which is a full 50% more than the standard 30K volts. To take full advantage of the increased spark a set of 0 ohm ignition wires from Granatelli Motor Sports are recommended so the full 45K volts can be delivered to the spark plugs. Unmodified Miatas can also benefit from the increase in spark output that will burn the air/fuel mixture more completely resulting in extra power and fuel mileage. 2

Dual Tip Muffler by Racing Beat

Racing Beat's dual tip muffler is produced entirely from 304 stainless steel for superior durability and appearance. The inlet tube features a thick, cast-stainless steel flange that provides excellent gas sealing capabilities. Additional strengthening for the inlet and outlet tubes is provided by supporting gussets and hanger support rods. Stainless steel outlet tubes feed a double-walled tip for an aggressive and sporty look. The two 3½" exhaust tips are manufactured using polished 304 stainless steel and are slightly oval in shape to provide a perfect balance and proportion with the Miata's rear bumper. 90-97 Miatas require purchase of the appropriate connecting pipe for installation. Does not fit MazdaSpeed version. 2

Dual Tip Exhaust System by Borla

Dual-ing Exhaust Tips! Manufactured exclusively for Moss Motors by Borla, this muffler provides performance AND awesome looks. Construction is typical Borla; ultra durable T-304 Stainless Steel tubing is used throughout. The Stainless Steel flanges and tubing are processed through the latest CNC technology resulting in flawless parts that are carefully welded by expert craftsmen. Take a look at the world class feature list:

- All Stainless Steel Construction throughout including flanges
- Industry Leading Craftsmanship
- Superior fit and finish
- Weight Savings - 5 Pounds lighter than OEM muffler
- Performance - flows significantly better than stock (Sport system = 64%, Touring system = 61%)
- Million Mile Borla Warranty
- Easy installation for home mechanics
- Available in two sound levels depending on your requirements
- Template for cut-out included
- Uses existing factory hardware

This system is not just another pretty face; it provides a significant increase in exhaust flow - over 60% better than stock. If you have invested in other performance modifications for your Miata, this exhaust will insure that all the extra air coming into your engine gets out just as easily. The Touring system offers all the performance and a sound nearly identical to the OEM muffler. For a more aggressive growl under acceleration, choose the Sport muffler. Both systems offer an ear-pleasing note that is unobtrusive while cruising. Industry leading quality, great performance, renowned warranty...That's Borla. 2

Stainless Steel Exhaust by Cobalt®

Treat your Miata/MX-5 to one of the finest Sport Exhausts available. Wanting only the finest, this muffler has an extensive set of features that make it the best:

- 1.2 mm thick polished Stainless Steel used for muffler shell, tips, and piping
- Muffler packing is a combination of stainless steel wool and fiberglass for a perfect sport scar sound that is never intrusive
- CNC cut Stainless steel flanges
- 409 Stainless Steel used for inner core and perforated tubing
- 60 mm Pipe Diameter
- Beautifully shaped oval Muffler
- All welds on muffler are ground smooth and polished
- Entire muffler completely polished to a mirror shine
- Sporty 3.5" insulated and polished muffler tip
- 5 Year Warranty*

With a sporty exhaust note and a mirror polish that shines like chrome, Cobalt's Miata Sport Exhaust is the perfect piece of eye candy for your favorite Roadster. Moss' huge buying power brings this one of a kind muffler to the market at a truly affordable price.

Stainless Steel 4 into 1 Header **NEW!**

All stainless steel construction throughout, 4 into 1 design for maximum power gains from the midrange through redline. Manufactured entirely from T304 stainless steel for superior durability, this 4 into 1 header includes a lifetime guarantee for many years of enthusiastic performance. The precision cut stainless steel engine-to-header flange transitions smoothly to primary tubing that collects into the 2½" OD secondary. Exhaust gas exits the header through a specially designed stainless steel rear flange which mates to the factory mid-pipe, or the RoadsterSport 2½" mid-pipe for maximum horsepower gains. Not CARB approved. Requires removal of the primary factory converter. (Mazda utilizes a heavy-duty metal gasket that we have found can be reused several times.) 3

06-08	4 into 1 Header	904-935	\$449.95

RoadsterSport Exhaust

The new 2006 RoadsterSport MX-5 exhaust wakes up the Miata. The sound is pretty mild at cruise, at 3500 to 4500 RPM it has a nice deep purr when you step on it. All polished stainless steel construction for many years of performance.

- Key Features:
- 7 lbs. lighter than stock
- Uses factory cutouts and hangers
- All stainless steel construction
- 3½" Tips with baffle insert to adjust tone
- Lifetime Warranty 2

Jackson Racing Performance Header

The Jackson Racing header pulls hard through a wide power-band without that head-throbbing resonance often found in low-quality headers. Features include heavy gauge steel, mandrel bent tubes, CNC-machined flanges and ceramic coating. The result is a TIG-welded header that provides maximum performance, total precision and lifelong durability. Manual transmission only. 99-00 Miata requires EGR tube for fitment. 2

Appl	Description	Part#	Price

¹The 99-05 JR Header is not CARB approved.

Power Pulse Header by Racing Beat

Racing Beat has developed the "Cutting Edge" in Miata header technology, utilizing both chassis dyno and road testing. Their headers incorporate a tuned 4-to-1 configuration to optimize exhaust gas scavenging and power output, while improving exhaust note. Hundreds of development hours and over 200 hours on the dyno were used in the refinement of this header. The Racing Beat 4-to-1 header has been tuned to provide horsepower and torque improvements throughout the entire RPM range. Equal length header utilizes 14-gauge polished stainless steel tubing and thick cast stainless steel flanges. For manual transmission only. Not CARB approved and will not fit with a JR supercharger. 2

Performance Header by Racing Beat ^{NEW!}

Manufactured entirely from 304-stainless steel to provide both outstanding durability and appearance, the Racing Beat 4-to-1 configured header is sure to offer the MX-5 owner many years of performance driving. Their exclusive, cast stainless-steel engine-to-header flange features specially designed exhaust ports that transition smoothly to the primary tubing. Large diameter 1.7" O.D. tubing has been used for the primary tubing, collecting into a specially configured collector assembly. Exhaust gas exits the header through an OEM stainless-steel rear flange, mating to the factory connecting pipe section.

Installation

Each header kit comes complete with detailed installation instructions and a plug-in OEM style electrical extension wire for the relocation of the secondary oxygen sensor. The stock engine-to-header gasket can be reused if there are no visible signs of distress or wear. (Mazda utilizes a heavy-duty metal gasket that we have found can be reused several times.) 2

Header Heatshield by TDR

The exhaust manifold is the main source of heat under your Miata's hood. By covering and isolating it with a Track Dog heat shield you will prolong the life of rubber engine parts. In addition, air entering your engine will be cooler allowing for maximum power to be generated from your Miata. Can be fitted to all factory and aftermarket headers. 2

Pads by Hawk

Designed for high performance street driving on a daily driven car. Hawk HP Plus pads are made from Ferro-Carbon making them race worthy for autocross, club and driving school events, or spirited driving on your favorite back road. They offer high friction and torque hot or cold. Due to the friction increase produced by these pads, rotor wear and dust may be increased. Hawk High Performance Street compound offers a higher coefficient of friction over stock pads and provides more stopping power and higher resistance to fade than other standard replacement pads. HPS pads are highly durable and generate less dust too.

Performance Brake Pads by EBC

Since Ceramic materials in brake parts were introduced in late 2003, it has received many positive write ups.

YellowStuff - have a full race material and capable of high temperature use with very good wear life, this new formulation sets a new trend in race type brake pad compounds. The "bite" from cold is superb which is uncommon with race materials (normally requiring warm-up) and makes this a pad which can be safely used on the highway as well as on the race track.

RedStuff - is a truly impressive fast road pad for repeated heavy braking. It emits far less dust than semi-metallic pads, and features EBC Brake-In™ surface coating which conditions the rotor surface and accelerates pad bed-in.

GreenStuff - has a high initial brake effect and gives a driver confidence from first application of the brake pedal. The EBC pad creates less dust and dust is more easily washed off than most.

Performance Springs by H&R

The most popular spring in H&R's line-up, Sport Springs will lower your Miata 1½" for a lower center of gravity, improved handling and a more aggressive appearance. Sport springs feature more control than that of the OEM Sport spring, but is still comfortable for daily use. Sport springs are an excellent choice for street and occasional track use.

Features:

- ISO 9001 Certified, TUV Approved
- Crafted from special 54SiCr6 Spring steel that provides the spring with unparalleled tensile strength and resiliency
- Lighter and more durable than other brands

Sway Bars by H&R

Designed to reduce body roll, increase lateral stiffness and improve handling, H&R sway bars are crafted from a special 50CrV4 spring steel that is both stronger and more resilient than competitor's sway bars. H&R sway bars are bent on proprietary machines designed by H&R that seamlessly produce beautiful complex curves making H&R sway bars a perfect fit for your vehicle. All H&R sway bar kits are shot peened and heat-treated, and feature precision forged ends. Also included are H&R exclusive bushings made from a Urethane/Teflon composite that eliminate squeaks, and don't require lubrication. Ever. 2

Wheel Spacers by H&R

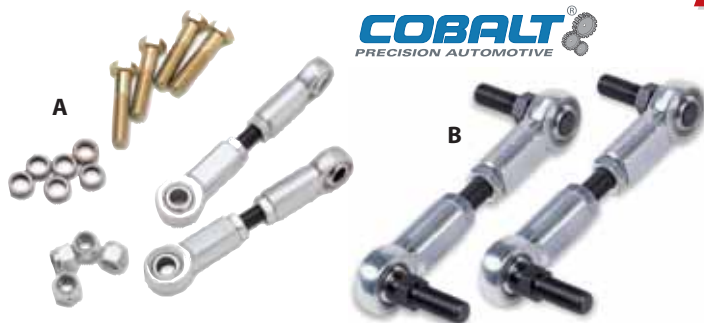

TRAK+ wheel spacers move the wheel out from the hub, effectively widening the stance of the vehicle and lowering its roll center. This simple modification increases lateral stability, which in turn provides improved handling, greater safety and of course, the sleek style you've been looking for. Whether you want improved handling, increased safety or simply want your car to make a statement about your individual style, TRAK+ wheel spacers can help you accomplish your goal. All DRS and DRM kits come complete with all hardware necessary.

NOTE: Miatas came with either 13 mm or 14.85 mm shoulder bolts. Please check before ordering.

DRS Series - This spacer is fitted between the wheel and hub, exchanging the existing wheel studs for longer ones. The wheels are then fitted to the hub/spacer with the existing wheel nuts.

DRM Series - This spacer is fitted to the hub with special nuts and it carries new wheel studs for the existing wheel nuts.

Sway Bar End Links by Cobalt®

Cobalt's end links are heim-jointed steel with Teflon lining, and help set your car up for more neutral handling by increasing chassis deflection. Each set includes two heim-joint end links, all necessary spacers, and they fit either front or rear sway bars. 2

Appl	Description	Part#	Price
90-97	A. End Links - Pair	902-180	\$89.95
99-05	B. End Links - Pair	902-181	79.95

Sway Bar End Links by Racing Beat

A direct swap for the Miata factory links and provides the performance enthusiast the ability to set either front or rear sway bars to a "neutral position" while the chassis is at ride height to avoid pre-loading of the bar. The experienced enthusiast may wish to purposely "pre-load" the bar to create a specific handling characteristic to induce either a mild understeer or over steer condition. The CNC machined aluminum end housings are fitted with urethane bushings to further reduce flexing. Each set contains two links to serve one sway bar. 2

Appl	Description	Part#	Price
90-97	Front or Rear	902-670	\$59.95
99-05	Front	902-672	59.95
99-05	Rear	902-670	59.95

Sway Bar End Links

Direct replacement for front and rear solid end links. These competition end links are heim-jointed for adjusting preload on the sway bar. Links are sold individually.

Appl	Description	Part#	Price
90-97	Front & Rear	903-981	\$39.95

PERFORMANCE

Solid & Tubular Adjustable Sway Bars

Increase the handling performance of your Miata by reducing sway and body roll. Jackson Racing sway bars directly replace the factory bars and allow adjustment so you can tune the car to your ride height. Polyurethane bushings and all mounting hardware are included. All Jackson Racing Sway Bars come with easy-to-read instructions and a lifetime warranty against breakage. 2

Jackson Racing's popular Adjustable Tubular Sway Bar Set is available for the 1.8 Miata. The rear bar is solid and the front bar is tubular, weighing only 50% of the solid bar, while maintaining superior strength and durability. Supplied as a tuned front and rear set. 2

Appl	Description	Part#	Price
90-93	Solid Sway Bar Kit - Front 22 mm/Rear 16 mm	999-700	\$209.95
94-97	Tubular Sway Bar Set - Front 27 mm/Rear 19 mm	999-702	229.95
99-05	Tubular Sway Bar Set ¹ - Front 27 mm/Rear 19 mm	999-703	229.95

¹Rear bar is not adjustable

Sway Bar Set by Cobalt® **NEW!**

The latest Mazda Miata handles well from the factory, but Mazda had to compromise in order to meet the expectations of all potential drivers. As a result, Mazda has left room for improvement even in the suspension of cars with the factory Sport package. The addition of Cobalt hollow sway bars will reduce your Miata's body roll, making your Miata more responsive to turning, more settled in transitions, and more fun to drive. The stiffness has been carefully chosen to enhance handling and balance without ruining your ride quality. The rear bar is two position adjustable. 3

Appl	Description	Diameter	Part#	Price
06-08	Front & Rear	25 mm Front/17 mm Rear	920-330	\$269.95

Performance Rear Chassis Brace by Cobalt®

Cobalt's performance chassis brace is stamped from 16-gauge steel and utilizes four existing mounting points. Boxing in the rear control arm mounts offers additional stiffness over two point braces. Brace incorporates a removable section to easily install around your exhaust. Powdercoated black for a durable finish. 2

Appl	Description	Part#	Price
90-91	Rear Chassis Brace	902-025	\$79.95
99-05	Rear Chassis Brace	902-025	79.95

PPF Stabilizer Kit

The PPF power kit is an add-on to reinforce the factory PPF (Power Plant Frame) which is susceptible to bending and flexing. By further strengthening the PPF, movement and vibration is reduced in the drive train, especially in higher HP Miatas. This translates into a more stable platform for power delivery to the rear wheels. The PPF power kit also reduces the intensity of the "65 MPH shimmy." Fits manual transmission only. 2

Appl	Description	Part#	Price
90-05	PPF Stabilizer	904-300	\$214.95

903-971

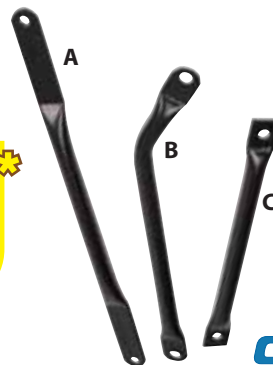

903-972

Competition Mounts & Bushings NEW!

Competition parts that were once only available to the Miata racing community are now available through Moss Motors. Higher horsepower and aggressively driven Miatas will benefit from these rubber replacement bushings and mounts that are 40% stiffer than stock. Engine and differential mounts keep everything in line by minimizing flex. This will allow the most power possible to reach the rear wheels. Mounts are sold individually. 3

Appl	Description	Part#	Price
90-03	Engine Mount	903-971	\$39.95
90-03	Differential Mount	903-972	59.95

Chassis Braces by Cobalt®

Tie your lower body structure together for better handling and a smoother ride. Installation is simple and straightforward. 2

Appl	Description	Part#	Price
90-93	A. Front Brace	902-040	\$38.95
90-91	B. Rear Brace	902-045	38.95
94-97	C. Rear Brace	902-035	39.95

Heavy Duty Sway Bar Mount Brackets

Performance driving can take its toll on the factory sheet metal swaybar mounting brackets causing them to flex, twist and even tear. In some instances, the addition of performance sway bars can exacerbate the problem. The cure is a pair of heavy gauge replacement steel mounting brackets. Made to fit in place of the original brackets these heavy duty replacements will not flex or twist and are finished in durable black powdercoat. 3

Appl	Description	Part#	Price
90-05	Mount Brackets - Pair	900-187	\$169.95

Urethane Engine Mounts NEW!

Stop power robbing drive-train rocking when transitioning from gas-on to gas-off. AWR heavy-duty urethane engine mounts come in three durometers depending on your need. Each urethane bushing is encased in a silver powdercoated bracket to keep your engine stable. Now you can put the power to the ground instead of into rocking your engine. 3

COBALT
PRECISION AUTOMOTIVE

3-Point Shock Tower Brace by Cobalt® **NEW!**

Don't bother looking for a strut brace that compares with this one. Oval section stainless steel tubing is mated to beautifully crafted tower supports. The welds on this brace are a work of art! Aside from the best craftsmanship available, this brace actually works. Patterned after Le Mans style chassis bracing, this piece mounts in three places including a special bracket that secures it to the firewall. This ensures rigidity that cannot be duplicated by lesser quality braces that simply mount from shock tower to shock tower. Comes complete with instructions and all necessary hardware. Two year warranty. Fits all NA, Turbo and JR Supercharged Miatas! 01-05 JR M45 supercharged Miatas need the installation kit to re-route the air filter inlet for installation. (Does not fit on LHD-ABS cars.) 3

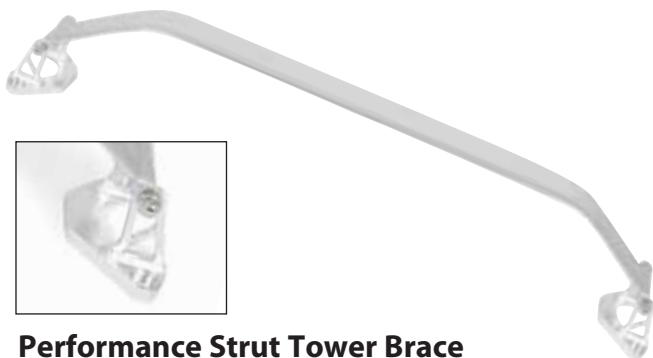

Appl	Description	Part#	Price
90-05	Shock Brace	904-651	\$214.95
01-05	Installation Kit	904-652	99.95

Rear Strut Brace

The perfect complement to our front strut tower brace. A rear strut tower brace ties the upper chassis together to reduce flexing and allow the suspension to work as designed. CNC machined from billet aluminum, this brace is not only strong but light weight. 90-97 Miatas require the spare tire to be relocated. 2

Appl	Description	Part#	Price
90-05	Rear	904-640	\$159.95

Performance Strut Tower Brace

Improve stability in the corners. All aluminum construction locks the top of your strut towers together for greater stiffness and reduced flex when cornering. It's a difference you can really feel! CNC machined and expertly welded for a perfect fit. Sturdy cross bar measures 2 1/4" wide and over 1/2" thick. Fits 99-05 without cruise control. Does not fit Miatas equipped with JR Supercharger. 2

Appl	Description	Part#	Price
99-05	Front	904-615	\$119.95

COBALT
PRECISION AUTOMOTIVE

Seatbelt Tower Brace by Cobalt®

94-97 Miata owners were given a factory seat belt tower brace that was inadequate for the job not to mention early Miata owners that were left out altogether. Cobalt has engineered and produced a billet aluminum brace for the 90-05 Miata, which mounts to factory holes, and offers more stiffening than the factory brace. Beautifully polished aluminum brace works with Glass window tops, Cobalt Windstop, and Moss Style Bar. 2

Appl	Description	Part#	Price
90-05	Seatbelt Tower Brace	902-047	\$99.95

Competition Bushings

Competition parts that were once only available to the Miata racing community are now available through Moss Motors. Higher horsepower and aggressively driven Miatas will benefit from these rubber replacement bushings that are 40% stiffer than stock. This will allow the most power possible to reach the rear wheels. Stiffer suspension bushings will tighten up the suspension and make it respond quickly to driver input. All bushings are sold individually. 3

Oil Cooler Kit by Cobalt®

While most people consider Cobalt's oil cooler kits an added insurance policy for their car, it actually can help improve performance. By increasing oil capacity and cooling the oil that flows through your engine, your car will run cooler and last longer. The kit includes a remote oil filter mount for easier access. For those of you who drive in cold weather, we offer a shroud that snaps on over the oil cooler to maintain minimum required oil temperatures. 3

Appl	Description	Part#	Price
90-05	Oil Cooler Kit	902-120	\$319.95
	Oil Cooler Shroud	235-805	16.95
	Bracket Kit (for ABS cars)	166-000	35.95

Cool-Tek Oil Filter Relocation & Cooler Kit

Changing the oil on a Miata is a chore because of the filter location. You have to be double jointed just to reach the filter and then hope you can bust it loose. Cool-Tek has engineered a filter relocation kit that moves the oil filter to the firewall for quick and simple filter changes. As an upgrade to the relocation kit they offer an integrated oil cooler and thermostat. The cooler an engine runs the more power and longevity it will have. In extremely cold climates the addition of the thermostat keeps the oil from circulating through the oil cooler until the oil temperature reaches 180 degrees. This allows your engine oil to achieve proper operating temperature as quickly as possible. 2

Appl	Description	Part#	Price
90-05	Filter Relocation Kit	902-211	\$84.95

GOODRIDGE

Stainless Braided Clutch Line by Goodridge

Utilizing Teflon tubing with a stainless steel outer tube, this line is a must for any clutch system. Our high performance stainless braided clutch line offers superior performance, longer life and better pedal feel since OEM rubber lines expand.

Appl	Description	Part#	Price
90-94	Clutch Line	903-148	\$39.95
95-97	Clutch Line	903-158	29.95

Sport Shifter by Cobalt®

The Miata has a great gearbox, we have succeeded in making it even sportier! Cobalt's sport shift kit reduces shift throw by 25%. Shifting is even easier with a simple flick of the wrist. To ensure OEM quality and performance we use genuine Mazda parts with our sport shifter. Complete with instructions and ready to install. Knob sold separately. 2

Appl	Description	Part#	Price
90-01, All	Sport Shifter	994-000	\$149.95
02-05, 5-spd	Sport Shifter	994-000	149.95
06-08, 6-spd	Sport Shifter	994-050	99.95

Lightweight Flywheels by ACT

ACT XACT flywheels provide significantly improved engine response, acceleration and a higher degree of safety than the original stock flywheels. All ACT XACT flywheels feature a super rigid, trouble free single piece design. This one-piece design allows less opportunity for failure and provides for uniform and efficient heat transfer from the clutch, eliminating warped inserts and loose ring gears.

Key Features:

- Quicker acceleration and increased throttle response
- Maximum gear life – gear will not wear out or fall off
- Serviceable – can be resurfaced with no need to purchase additional parts
- Chrome-moly forgings three times more rigid than aluminum
- Longer lasting because of heat treated friction surfaces
- Excellent heat capacity from retaining adequate material behind the friction surface
- Super rigid trouble-free single piece design
- SFI certified to insure safety
- ProLite (9 lbs.)

Appl	Description	Part#	Price
94-05'	ProLite - 9 lbs.	904-555	\$349.95

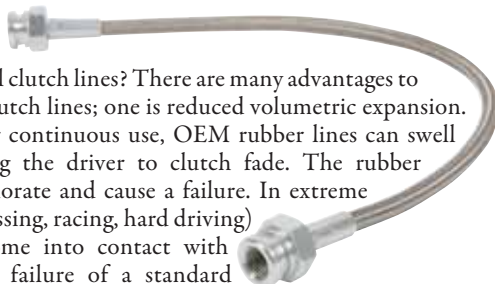

*Note: Can be installed on 90-93 1.6L when clutch is upgraded to the 1.8L clutch.

Stainless Clutch Lines

Why use stainless steel clutch lines? There are many advantages to using stainless steel clutch lines; one is reduced volumetric expansion. Over time and under continuous use, OEM rubber lines can swell and expand, exposing the driver to clutch fade. The rubber covers can also deteriorate and cause a failure. In extreme applications (autocrossing, racing, hard driving) rubber hoses can come into contact with debris, thus causing failure of a standard rubber line. DOT approved. 3

99-05	Performance Radiator	903-601	499.95

Belt Profile:

Fits the pulley *precisely* because the belts are precision ground, not cut

Adhesion Layer:

The service life of the belt is extended, thanks to the patented EPDM compound

Gates Racing Belts

Incredibly strong, extremely heat resistant. Tough enough to take the worst pummeling your engine can dish out. No other belts help protect your engine and deliver high performance like Gates Racing Performance Belts. Yes, the color gives you a hot custom look. But look deeper. Constructed of HNBR elastomeric composites, Gates Racing Performance Belts are 300% stronger than stock belts and deliver up to three times the heat resistance. You can count on them to hold up to the rigors of high horsepower, even with interference engines.

Wear Resistant Teeth- High saturation HNBR elastomeric composites contribute to the exceptional durability and heat resistance with aramid reinforcement.

Robust Reinforced Tooth Jacket- Durable nylon fiber provides extra wear resistance, doubling tooth strength.

Super Strong Tensile Cord- Added strength comes from premium, high-strength glass cords.

Intake Manifold Heat Insulating Gasket by Hondata

Hondata has developed a special high temperature, insulating gasket that replaces the stock intake gasket. The Miata manifold is heated in up to 5 places: The cylinder head, the cold idle valve, the idle control valve and the throttle body heater. Hondata's new gasket, coupled with bypassing several heat sources, significantly reduces the transfer of heat from the cylinder head to the intake manifold and incoming air, giving you up to 5% more power. The intake manifold is made of aluminum and because it is heated by the cylinder head from combustion and coolant, it works to increase intake air temperature by as much as 75°F. In fact, for every 5°F rise in intake temperature, air density drops 1%. The hotter the air, the less fuel the computer injects to compensate for reduced oxygen. Around town, testing has shown an average drop of around 20°F. In certain conditions a 50°F drop has been measured. Installation instructions included. 3

90-97	Front & Rear - Pair	903-985	\$54.95

Racing Tow Hook NEW!

Hopefully you will never need this handy tow hook but it sure gives your MX-5 an aggressive look. Swivel design lets the hook retract out of the way when not in use. Threads into an existing hole in the passenger side of your front grille. Available in three complementary colors. 1

06-08	Black	907-202	54.95

TC² Fuel Injection Controller by PowerCard®

You've modified your Miata, now give it the extra fuel it needs. To make that combination of intake, header, exhaust, cams, headwork, etc. run at peak efficiency, you may need more fuel than the stock ECU can deliver. PowerCard TC² is a unique, load based fuel adder which works with the factory ECU. TC²'s simple push button interface and powerful loadbased technology render complex table based throttle position/RPM re-mapping systems a thing of the past. PowerCard TC² has three different modes which correspond to different performance parameters:

Cruise Fuel - This is for light load situations, such as cruising or very light acceleration.

Transition Fuel - This is when you transition from cruise to real acceleration, and need a proper shot of fuel for the sudden change in load.

High Load Fuel - This is where you are asking for sustained and maximum acceleration or top speed performance. PowerCard TC² works independently of throttle position and RPM, which are not reliable indicators of load. By looking at duty cycle instead, PowerCard TC² can be tailored to your car's specific needs. Both the transition points between modes, and total fuel added in each mode, are cockpit adjustable while you drive. The TC² is perfect for tuning styles from "butt dyno" to speed shop rolling roads.

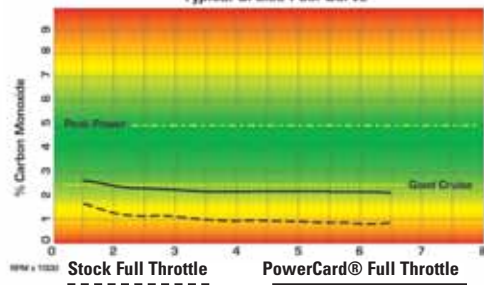

Just as driving styles differ, no two Miatas are exactly the same. That is why PowerCard is such a powerful and flexible tuning tool. It allows you, the user, to program when and where additional fuel will be delivered. Not emissions legal.

PowerCard Pro-Series - For advanced requirements like voltage clamping, offsets, voltage generation, pressure transducer, nitrous fueling, etc., the Pro-Series PowerCard offers a full suite of professional features. Check out our Pro-Series PowerCard at www.PowerCardTuning.com

Typical Cruise Fuel Curve

Typical Full Throttle Curve

These two charts represent a typical cruise and full throttle roll-on fuel curve, as measured by %CO (carbon monoxide). You can easily see how effective the PowerCard™ Fuel Injection Controller is at creating an optimum fuel curve when installed on emission based vehicles.

Wide Band O₂ Sensor & Controller w/Gauge by Innovate Motorsports NEW!

Don't waste your time looking at your spark plugs to figure out if your car is running lean or rich, or trusting the stock O₂ sensor. Innovate's wideband O₂ sensor and controller take the guesswork out of analyzing your air/fuel ratio.

Wide Band O₂ Sensor Controller - The LC-1 Lambda cable is a complete wideband controller built in to a sealed cable. It includes digital input, output, and 2 user programmable analog outputs. The LC-1 is more accurate than a stock O₂ sensor, which is only calibrated to accurately analyze an air/fuel between 14:1 and 15:1. The LC-1 wideband O₂ sensor and controller can read and accurately interpret air/fuel ratios from 9:1 to 17:1. With the included digital gauge this information is relayed to you instantly. The LC-1 has many benefits over conventional designs costing many times as much, and its self-calibrating circuitry can compensate for changes in temperature, altitude and sensor condition. The LC-1 also works for applications such as Dynos, Data Acquisition, Standalone ECUs, piggyback fuel controllers, OBD-II software or chip programmers, and gauges. The LC-1's analog outputs are compatible with dynamometer software, gauges, or virtually any brand of Data Acquisition hardware.

Includes DB-Red Gauge

Key Features

- Only fully digital wideband controller.
- Auto calibration capability to compensate for changes in temperature, altitude, and sensor condition.
- Two user programmable analog outputs.
- Permanent install applications.
- Easy to upgrade.
- Includes LogWorks software.

Kit includes the LC-1, sensor, DB-Red digital gauge, CD that includes software and manuals, bung and plug, and a serial cable to connect to a PC. 2

Billet Hood Pins ^{NEW}

Exclusively designed for the Mazda Miata and MX-5 with stock hood. This is more than a set, it's a system. Extensive engineering has gone into making our hood pins function as well as they look. The 6061 T6 billet aluminum plates are precision-machined then brushed before being clear anodized. Specially designed Delrin bushings secure the stainless steel lynch pins to the plates and prevent scratching and wear. Vinyl covered stainless steel lanyards keep track of the lynch pins when the hood is open. The adjustable hood pins and retaining nuts are highly polished stainless steel to catch the eye and provide years of service. Special mounting brackets are also included. Permanent modifications to the hood and radiator cover panel are required. 3

Satin Stretch

Stormproof

The culmination of over a decade of material engineering, it has only recently been possible to manufacture the microscopic yarns which go into this advanced micro-fiber cover material. Only one textile mill in the world was able to meet the specification - the results are truly a triumph for car cover users! Stormproof is uncoated and untreated, this means that even after months or years of use, it will retain the same properties as the day you purchased it! Stormproof has tested to be the most water resistant and (because there are no coatings) the most breathable car cover material you can buy. You can't go wrong with Stormproof.

Appl	Description	Part#	Price
90-97	Stormproof	239-802	\$179.95
99-05	Stormproof	239-812	179.95
06-08	Stormproof	904-541	179.95

Silverguard Plus

Silverguard Plus is a 300 Denier polyester material with a reflective, water resistant coating on the outer layer and a soft, non-abrasive layer on the inside. It is a great choice for all-around car cover use, suggested for most conditions except extreme rain, snow or ice. 300 Denier is a strong, heavy weave, which will not rip or tear easily. The silver coating on Silverguard Plus does an excellent job of reflecting sunlight, while keeping rain and animal droppings from damaging the vehicle finish. The special soft inner layer pampers the most delicate paint finish.

Appl	Description	Part#	Price
90-97	Silverguard Plus	238-802	\$109.95
99-05	Silverguard Plus	238-812	109.95
06-08	Silverguard Plus	904-546	109.95

Mosom Plus

Mosom Plus is a four layer material. The outer two layers are Spunbond Polypropylene, the middle layer is a special micro-porous film and the inside layer is super soft fabric. The middle layer is an excellent rain barrier, while allowing for vapors to pass through. The special cotton flock inner layer pampers the most delicate paint finish. It is a great choice for all-around car cover use, suggested for most conditions except extreme sun, snow or ice. Mosom Plus is a non-woven material, so in the unlikely event a rip occurs in the material, it will not run.

Appl	Description	Part#	Price
90-97	Mosom Plus	238-800	\$99.95
99-05	Mosom Plus	238-810	99.95
06-08	Mosom Plus	904-540	99.95

Coverguard

Features include double-stitched seams with neoprene elastic sewn in the front and rear bases for a snug fit, and scratchproof grommets for locking or tying down your cover. An economical material but with a body-specific fit for easy installation. Single layer material - best for dust prevention and short term use. Suitable for indoors and outdoor use in covered areas.

Appl	Description	Part#	Price
90-97	Coverguard	236-600	\$59.95
99-05	Coverguard	236-610	59.95

Satin Stretch Snug Fit Car Cover

The Satin Stretch car cover is like a silky, sexy dress for your Miata - it shows every curve. Satin Stretch custom car covers are made for Miatas parked indoors, and for owners who want nothing but the best for their vehicle. The material has Lycra fibers that stretch in every direction, mirroring every contour of your Miata. The inner liner is the softest fleece available - specially designed not to rub off on convertible tops.

Robbins Auto Tops – The Best since 1943!

Robbins' Tops Features:

Computerized Cutting - Gerber Cutter cutting technology to ensure all pieces are the correct shape and size.

Factory Designs Improved - Robbins improves upon factory designs by adding reinforcements, better heatsealing processes, and other proprietary manufacturing techniques to produce the highest quality tops available.

Heatsealed Reinforcements - All seams are double stitched and heatsealed for extra strength and to prevent side to side shrinking. Seams will not bubble or fail over time as do glued reinforcements.

Innovation - Robbins has been granted numerous patents for their innovative designs and techniques. They are the industry leader.

Since 1943 - Family owned and operated by three generations of Robbins family. Their experience is unmatched in the industry. All products are still made in the factory in Ventura, California.

Window Options:

Plastic Window - Ultra-clear 40 gauge UV coated. Will hold up longer than any other plastic window material against UV damage and common scratches.

Standard Glass Window - Glass window tops offer a clear rear view that you just can't get with plastic. Robbins' glass windows are tinted and tempered safety glass. They are marked AS-2 to show they meet NTSA and Federal Motor Vehicle Safety standards.

Defroster Glass Window - A direct replacement for 99 and later Miatas. The defroster glass window is a great upgrade for 90-97 Miata owners with the hardtop option. 93-97 Miatas without the hardtop option can upgrade to a defroster window by purchasing an optional wiring harness.

Note: 1993-95 models not equipped with a dedicated heater-defogger switch should operate the heater-defogger only with the top closed and latched, as it operates when the fan/heater switch is turned on to any setting.

Top Materials

Vinyl - Made from Haartz 38 oz. Cabrio Grain vinyl, the same weight and patterned grain found on original Miata tops. Backing is 100% Polyester for strength and pliability, and bonds better to vinyl. Cotton backing used by other companies is less expensive but shrinks and becomes brittle over time.

Black

Tan 90-97

Tan 99-05

Blue

Grey

Sunfast Canvas - Robbins' Sunfast canvas, aside from being the most sensuous topping available, has a practical side as well. Sunfast canvas resists fading and shrinking better than vinyl and stretches much easier in colder temperatures. This means you don't have to be Hercules to put your top up on a cool morning.

Streamline Top

Great *Features*, Great *Price*, Great *Value*!

Zipperless Rear Window

- Easier Folding
- No Zipper to Break
- Drop & Go

Defroster Glass Window

- Clear Visibility
- Plugs to Hard Top Harness
- Heat Sealed, Not Siliconed

No Deck Seams

- Smooth Look
- Easier Up Keep
- Sewn & Heat Sealed

Streamline tops are made to the exact pattern of the new MX-5. The Streamline design eliminates the deck seams (front to back seams above the doors) and the rear window panel standard on 90-05 Miatas. This makes for an outstanding looking top that is sleek and smooth. The top incorporates a zipperless window so putting it up and down is no longer a hassle. Manufactured to Robbins' industry leading standards for quality, superior fit and value. Three year warranty. 4

Replacement Convertible Top Windows

Replacing the window in your convertible top might seem like a good idea at the time but there is more to the process than meets the eye. The replacement window comes with a full replacement zipper - both sides. Your old convertible top must be removed from your Miata for the replacement zipper to be sewn to your old top. Once that is done the corresponding zipper is sewn on to the window so they line up properly. Once done, your old top with the new window, is then reinstalled on your Miata. At the end of the process the labor for sewing in the new zipper and removing and reinstalling the old convertible top is more than the labor for installing a completely new convertible top. However, if your mind is set on replacing the window only, give us a call and we can special order it for you.

Window Protector

Keep your rear window looking new and scratch free. Our vinyl window protector incorporates a soft felt lining that won't scratch and a strong vinyl exterior for maximum UV protection. Supplied with double snaps.

Appl	Description	Part#	Price
90-97	Tan	240-256	\$41.95
90-97	Black	240-255	32.95

Interior Cover

Protect your interior without the bulk of a full tonneau cover. Installs in seconds. Top must be in the down position.

Appl	Description	Part#	Price

¹Not for power retracting hardtop

Cool Breeze Scoop™

Do you find yourself hot and uncomfortable even though the top is down? Are you constantly trying to scoop in air with your hand from above the windshield or through the window? With the Cool Breeze Scoop™ you will have fresh outside air being forced in over the console and into the foot wells and cooling you below the waist. The Cool Breeze Scoop™ is an easy-on/easy-off accessory that takes less than 10 seconds to install and fits easily in your glove box when not in use. The Cool Breeze Scoop™ is molded from an automotive ABS/Polycarbonate composite plastic. It is non-reflective black with a textured finish. It can be primed and painted in a color of your choice with flexible bumper paint, but looks great the way it is delivered. 1

RACING BEAT

Type II Style Bar by Racing Beat

Racing Beat's style bar utilizes thick-walled 2 1/4" mandrel-bent tubing in a classic twin hoop design that projects a muscular and aggressive image. The Type II style bars are available in your choice of chrome, or powdercoated satin black. This bar adds the additional benefit of increasing chassis stiffness across the mid-section of the car. All of our style bars are designed to function without interfering with the operation of the stock factory soft and/or hard tops, and aftermarket replacement tops equipped with glass windows. Requires cutting the plastic seat belt tower covers. Not intended for roll over protection. 2

¹SCCA Approved

Roll Bars by Boss Frog

Boss Frog manufactures some of the highest quality roll bars available for the Mazda Miata. All of their products have undergone destructive testing using the SCCA guidelines, so you can be assured of what you are buying. Boss Frog roll bars are made of the highest quality 1 3/4" x 1/8" wall DOM tubing, with heavy 7 gauge laser cut flat parts. Each rollbar is manufactured in a precision welding fixture to assure the absolute best fit. They utilize TIG welding for all tubing joints, to provide a higher strength but yet smaller weld joint, and the highest quality finished appearance. All Boss Frog roll bars include seatbelt adapters to aid in seat belt retraction. 3

COBALT
PRECISION AUTOMOTIVE

Style Bars by Cobalt®

Another Moss exclusive! Our Cobalt style bar is manufactured so that no cutting of your interior body panels is required! Seat travel and recline are not impeded. Available in your choice of chrome or black powder coat. Installs in about 30 minutes with simple hand tools. Instructions included. May interfere with factory windblocker on 99-05. Don't forget to get our style bar windblocker. *NOTE: These Style Bars are decorative items only, not intended for roll over protection. 2

90-05	Black Powder Coat	903-310	179.95
90-05	Windblocker	904-165	69.95

Roll Bar NEW!

Seat Belt Adapters

Installing a roll bar in your Miata is one of the first things a safety conscious owner should do. However, to get the protection and support necessary from a roll bar, it ends up interfering with the seat belt retraction causing the belt to rewind slowly. Alleviate the problem today with these offset seat belt adapters that allow your belt to retract as it used to. 2

Appl	Description	Part#	Price
90-05	Offset Seat Belt Adapters - Pair	904-598	\$39.95

Universal Removable Bicycle Rack

This universal bike rack installs in minutes and holds up to three bikes securely.

Luggage Racks

To personalize your Miata you need choices, if you are in the market for a luggage rack we have searched far and wide and these racks will suit just about every taste or requirement.

A. Contemporary looks in a non-permanent package. The style of the modern look rack is what will grab your eye. Fully functional and made from high quality stainless steel that will never rust. No permanent modifications required (50 lbs. max. weight).

B. If a nostalgic look is what you need, we offer the vintage removable rack. While vintage in appearance it has many modern features, most notably electro-polished stainless steel construction that will never rust. This rack installs in minutes with no permanent modification required and comes completely assembled (50 lbs. max. weight).

¹Does not fit MX-5s with Power Hard Top

Why You NEED A GRILLE:

A grille adds individual style and more importantly offers maximum protection for your radiator against damage from rocks and road debris. It is the first upgrade you should invest in for your Miata, simply a must have. Grilles come in a variety of colors and styles and installation is just two bolts and about 15 minutes (except 06-08 MX-5s which require the removal of the front fascia).

(A) High-Flow Grille

Protection with a minimal loss of airflow. Gloss powdercoated for durability. 1

Appl	Description	Part#	Price

B

Polished Diamond Grille NEW!

Add a touch of Euro-styling to your MX-5. European design was the inspiration behind our stainless mesh grille. Highly polished finish looks great and won't rust or corrode. Replaces the factory grille. 3

Appl	Description	Part#	Price
06-08	Polished Diamond Grille	903-670	\$127.95

Stainless Steel Mesh Grille

Great looking stainless grille will give your Miata that sleek sports car look. A direct replacement for the factory grille. No need to worry about rust and tarnishing with its all stainless steel construction. Bumper cover must be removed to install. 3

Appl	Description	Part#	Price
06-08	Stainless Grille	901-786	\$99.95

Polished Grille

Mazda finally gave the Miata a grille in '06 but it ended up being made in black plastic. We found this great looking grille, and best of all, it is made in highly polished stainless steel. Not only will your Miata continue to be protected, our gleaming grille will enhance its appearance. 3

Appl	Description	Part#	Price
06-08	Stainless Steel Grille	904-913	\$119.95

Folding Hardtop Carrier NEW!

Easy to set up to hold your hardtop, then folds up to store away and save space! This hardtop carrier is made of durable black powdercoated steel, but is lightweight so it's easy to set up and move. Four wheels make it easy to maneuver and padding protects your paint. It holds your hardtop upright, further maximizing space usage!

Appl	Description	Part#	Price

Classic Speedster Tonneau Cover

The appeal of a classic roadster can be captured with our Speedster Tonneau Cover! The Speedster Tonneau is offered exclusively by Moss Motors for your Miata. Precision engineered from design through manufacturing, our Tonneau is made from high-quality ABS plastic. Tonneau is nearly indestructible, especially when compared to fiberglass, which is prone to cracking, breaking and sagging under stress. Our Speedster Tonneau is a 2-piece unit that assembles in minutes. Supplied paint ready and includes all necessary hardware for easy installation. Does not work with roll bars, style bars or factory wind deflectors. 2

Appl	Description	Part#	Price
90-05	Speedster Tonneau	903-450	\$349.95

PAYMENT

VISA, Mastercard, Discover, American Express, certified check, money order or personal check (which may be held until cleared). \$10.00 minimum order. If paying by charge card we will require charge card number, expiration date, complete billing address and the CVV2 code on back of card. Due to increasing fraud, some foreign orders may require additional documentation to process your order.

PRICES

All prices are subject to change without prior notice. Moss Motors reserves the right to correct any typographical errors.

SHIPPING

- Orders received by 3 p.m. local time are normally shipped the same day.
- We will ship by ground unless Air Delivery is specified.
- Alaska, Hawaii, Puerto Rico must use 2nd Day or Next Day Delivery only - add \$6 to chart. (Delivery times not guaranteed.)
- Oversize Shipments - Shipments under \$1,200 and over 130" length plus girth will be charged actual freight.
- Each shipment will reflect the appropriate shipping charges, including handling and insurance, listed on the chart below, dependent upon the parts value in each shipment.
- When ordering Direct Ship items and items that are stocked in our warehouse on the same order, only the total value of the stocked items in our warehouse is used to calculate your shipping charges from the chart. Direct Ship items will be invoiced to you separately at the Actual shipping charges from our Vendors.
- Orders shipped to California, Virginia or New Jersey will be charged state sales tax.

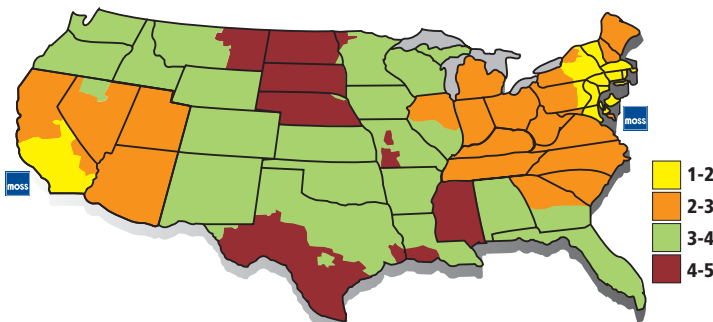

FOREIGN ORDERS (Includes Canada)

Foreign orders are charged actual shipping charges. Shipping quotes provided on request, only on orders over \$100. All duties and taxes are the responsibility of the customer. Foreign orders must be paid with a credit card or check in U.S. funds. There is a \$10 charge to cover shipping and handling costs for catalogs shipped outside of the U.S. and Canada. One catalog per request.

PARCEL DELIVERY SERVICE

Follow these simple steps to figure your exact total...

- Determine parts total and choose Ground or Air Service.
- Figure your ground shipping and handling charges based on your parts total and area using the map and chart below.
- CA, VA and NJ residents add sales tax. You now have your combined order total.

Areas / Approximate Delivery Time (In Days)

- This map represents approximate working days for Ground Delivery. (As quoted by our carriers, not guaranteed.)
- It also assumes that we can ship from the nearest warehouse. Items shipped from the alternate warehouse will take longer.

Shipping, Insurance & Handling Chart US Rates - 48 States (AK*, HI* & PR*)

*Alaska, Hawaii and Puerto Rico must use 2nd Day or Next Day Delivery service - add \$6 to the rates above.

- Free Ground UPS Shipping in the contiguous 48 states. Oversize packages greater than 130" length plus girth and truck items will be charged actual freight charges.
- Free Ground UPS/Truck Shipping in the contiguous 48 states.

SHIPPING continued

GUARANTEED AIR DELIVERY SERVICE (48 States)

- Guaranteed Next Day Air, Next Day Air Saver and 2nd Day Deliveries available.
- Next Day Air & Next Day Saver orders must be pre-paid by VISA, AMEX, MasterCard, or Discover.
- Moss guarantees that orders received before 3 p.m. your local time will arrive on time (barring weather problems, or "Acts of God"), or shipping and handling charges will be refunded.
- 2nd Day Air is guaranteed to be delivered by end of day the second business day after shipment. Next Day Air Saver is guaranteed to be delivered by end of day the day after shipment. Next Day Air is guaranteed to be delivered by 10:30 a.m., noon or end of day the day after shipment, depending on destination.
- Rates apply to orders with a real (or dimensional) weight of 50 pounds or less. If over this amount we will contact you with your shipping options.
- Saturday Delivery: Next Day Air orders placed on Friday and 2nd Day orders placed on Thursday for Saturday delivery will be charged an additional \$12.50. Saturday delivery does not apply to Next Day Air Saver and is not available in all areas.
- A.P.O., F.P.O. and P.O. Box orders are not guaranteed and will be shipped Parcel Post.

WHEN YOUR ORDER ARRIVES

- Delivery of merchandise in good condition is the responsibility of the carrier. Should your order arrive in damaged condition, immediately inform a Moss Motors' customer service representative at 1-800-689-9313.
- You must make claims for damage during shipping to Moss Motors within 3 days.
- Keep original box and packing material.
- If your order was shipped truck freight, note damage on the bill of lading when signing the delivery receipt.
- If there is any other question about your order, contact customer service within 10 days.

SPECIAL ORDER & DIRECT SHIP ITEMS

- Require pre-payment by cashiers check or credit card.
- May not be cancelled or returned.

BACKORDERS

- Occasionally, we are out of stock on some items. If you have already paid shipping costs on your original order we will pay the shipping charges for any backordered items.
- Backorders are shipped free but carry a handling charge of 99¢ per \$25 of value.
- You may request "No Backorders" or cancel backorders at any time prior to shipping.
- Canadian backorders will be charged based on actual freight. Canada is the only foreign country we backorder to.

WARRANTY

- All products are warranted against defects in material and workmanship by the original equipment manufacturer or Moss Motors, Ltd., for 12 months from the date of shipment.
- We will replace the product or refund your purchase price at our discretion.
- The warranty does not cover labor, failure of a related component, failure resulting from faulty installation, nor would the liability of Moss Motors exceed the cost of the original component.

RETURNS

- You may return new and uninstalled products in resalable condition for a full refund excluding shipping and handling charges for up to 6 months from date of invoice.
- Returns over 6 months, but less than 12 months will be charged a 10% restocking fee to cover our processing costs, in-house credit will be given on account usable on future orders. We reserve the right to charge up to 20% when no invoice is supplied and/or there is substantial work involved to process your return back to stock.
- Items over 12 months old are not returnable.
- Please remember to always inspect the parts upon receipt of your order to avoid any difficulties later on.
- To return a part follow the instructions printed on the back of the invoice.
- Make sure to package the products carefully to avoid damage during return and include all original packaging and a copy of the invoice.
- Refunds will not be issued for installed, damaged, incomplete, "Custom" or "Special Order" items.
- If a return is due to our error, we will reimburse reasonable freight charges. We will not reimburse additional charges for shipping/packaging services. Electrical items that have been installed are not returnable.

CATALOG ERRORS

- Every effort has been made to provide accurate information in this publication. We will not be held liable for inaccuracy of pricing, description or application.

Free Ground UPS shipping in the contiguous 48 states. Oversize packages greater than 130" length plus girth, direct ship items and truck items will be charged actual freight charges.

Orders must be placed by 3pm and is guaranteed to USA and Canadian customers. Parts must be from our inventory, offer does not apply to Factory Direct, Special Order and some oversized items that take special packing.

Are shipped directly from the manufacturer and actual shipping charges apply. Direct ship items do not qualify for free shipping. Most items are shipped within 5 working days of being received. Upon receipt of your order thoroughly inspect items for damage before signing for their release. Damage claims must be made with the shipper at the time of delivery. Manufacturers will not accept items for return that have been installed, painted or in not new condition. Credit or exchanges can't be issued for incomplete returns, 'Custom' or 'Special Order' Items.

TRACK DOG RACING

A

B

C

D

Protective Air Splitters by TDR

At speed the Track Dog Racing™ Air Splitter increases the down force on the front of your Miata lowering the center of gravity and giving the front tires more grip. As oncoming air hits the front of your Miata it creates a high pressure zone. The air splitter sends the majority of this high pressure air over and around your Miata to give it down force. The air that does go under your Miata has to increase in velocity which creates a low pressure area to further increase the down force. The air splitter also defends your Miata's front end against scraping and dings. Made from 1/16" thick, high-impact ABS plastic and built to take a surprising amount of abuse. Splitter extends 1.75" at the outer edges and 1" below the radiator opening. Includes all mounting hardware. Recommend painting the splitter for best appearance. For use with the factory front lower spoiler only. 2

Birds Eye Mirrors

Birds Eye mirrors fit over the factory glass. Aspherically bent, this mirror expands your field of vision up to three times from 16 degrees to a full 40 degrees making everything from lane changing to parking much safer. Made with an anti-glare glass (reduces night glare by 55%), its breakthrough technology provides stepless vision without double image distortion. No tools, no hassles, just peel off the backing and apply. The strong adhesive strip provides a solid hold. 1

Sylvania Lighting

Sylvania's SilverStar halogen bulbs are the brightest, 100% street legal, halogen on the road. Burning cleaner and crisper, with a color temperature of a white-hot 4000K, SilverStar bulbs burn brighter than any other halogen on the market. So the next time you have to replace them, do it right with Sylvania. 1

Spiderlite LED Taillight Bulbs

The Spiderlite is an advanced LED light bulb system that is designed to replace existing incandescent light bulbs and transform your stock taillight into a dazzling LED lighting module. The Spiderlite features spring loaded collapsible arms for installation through a mounting hole in the lighting module. LEDs are mounted on both sides of the arms to provide an even illumination. Add increased safety with brighter taillights and a custom look to your Miata. With the reduced electrical load of Spiderlite LEDs it is necessary to add the load balancer so your turn signal will not be in fast blink mode. 1

Appl	Description	Part#	Price
90-97	Red, 1156 - Pair	102-810	\$74.95
90-97	Red, 1157 - Pair	902-949	74.95

All	Load Balancer	337-961	19.95

3rd Brake Light Pulser

Enhance your safety by adding brake light pulsing to your third brake light. The brake light pulser module connects to your third brake light and automatically pulses it when you apply the brakes. The light will pulsate on and off for about a second, then stay on steady for as long as you press the brake pedal. Incorporated in the pulser is the "Delay-Repeat" circuit which requires the brake lights to be off for at least 15 seconds before the cycle can be restarted. So, if you are in bumper-to-bumper traffic, the brake light isn't always pulsing. 2

Appl	Description	Part#	Price
90-05	Brake Pulser w/15 second Delay	056-521	\$49.95
90-05	Brake Pulser w/o 15 second Delay	057-320	22.95

Daytime Running Lamp Module

This module allows your front turn signals to always be on for better visibility to oncoming traffic. It installs in less than a minute under your dash! Because of the laws in Canada where DRLs are mandatory, there is already a spot for it from the factory, so all you have to do is plug it in. Make your Miata safer and more visible without running your headlights popped-up all the time! 1

Appl	Description	Part#	Price
94-97	Lamp Module	902-424	\$101.95

Euro Spec Tail Lamps

Give the rear of your Miata a whole new look! Our new "Euro-Tails" are just like those used in Europe with clear turn signals and parking lights. 1

Appl	Description	Part#	Price
90-97	A. Euro Spec - Clear	902-991	\$149.95
90-97	B. Euro Spec - Black	902-992	149.95

Clear Side Marker Lamps

Replace your factory side markers with these stylish European clear markers. Comes complete with amber bulb and easy to read instructions. Sold as a pair. Fits 90-97 front and rear, 99-05 front only. 1

Appl	Description	Part#	Price
90-05	Clear Lamps	162-890	\$39.95

Hella Halogen Headlamps

Embracing European headlamp technology has allowed Hella to develop the brightest and most powerful lighting available. 50% more powerful beam on low-beam and 25% more on high-beam all in a DOT approved package. User friendly 2-piece design features a replacement bulb that can be easily and economically replaced. Now, everyday drivers can enjoy the same lighting performance and confidence as professional race and rally drivers. Moss Motors has sourced a new style boot that keeps water from getting inside the lamp unit and causing the bulb to explode. This boot can't be found from any other source. Lamps sold individually and include bulb and boot.

Appl	Description	Part#	Price
90-97	Hella Headlamp	902-968	\$46.95
90-97	Replacement Bulb	902-998	6.95

Stock

Dual Headlamp System by Cobalt®

For some time, we have been working on a high quality dual headlamp kit that incorporates the features you need but eliminates the weaknesses of the products currently available. The result is the finest dual headlamp system available for the Miata with no compromises. Take a look at our feature list and compare it to anything else available. You will quickly see why this system is worth every penny. 2

1. Hella DOT Approved Lamps. These units have proper Lo Beam and Hi Beam Lamps supplied. Easily adjusted with a simple phillips screwdriver once installed. Bulb Specs: 90 mm diameter and 65 watts.

2. Superior Bucket Design. Our bucket is a simple one piece design. Instead of just being spray painted, they are completely powder coated for a finish that is as long-lasting as it is beautiful. Also, our design incorporates an inner visor design that eliminates the glare coming from the inside headlight. This simple design also means an easy installation, about one hour per side.

3. OEM Quality Wiring Looms. The Moss Dual Light system uses properly engineered and manufactured automotive grade wiring harnesses. These looms allow for "plug and play" installation from the Hella lamps to the factory wiring harness.

4. Thorough Installation Instructions. Our instructions leave nothing to the imagination. A step by step tutorial with plenty of high resolution pictures make the installation of this system easy.

5. Backed by Moss Motors. With over 60 years in the business, Moss has built a solid reputation for customer service. The buckets and wiring looms carry a lifetime warranty. The Hella lamp units (less bulbs) carry a two year warranty.

Direct ship orders are shipped right from the manufacturer. The manufacturer will receive your order within 24-48 hours and most items ship within 5 working days. While shipping times are slightly longer, by not stocking these items we can offer lower prices. Orders must be paid in advance by charge card or certified check. Actual shipping charges apply. Direct ship orders do not qualify for free shipping.

Deluxe Leather Seat Covers

Have you been thinking of upgrading to leather seats for your Miata but did not want to pay the high labor costs for a professional installation? Take a look at our leather recovering kits, they simply are a stroke of genius. Using some very clever manufacturing techniques, these covers feature leather in the seating surface insert and have been made in a way that allows you to simply stretch and fit them over your existing seats. The fit is simply outstanding and total installation time is less than an hour. Contoured, sewn and shaped to specifically fit your Miata's seats, you will be amazed at how great your new leather seats look and have the satisfaction that you did it yourself. The best part is the great price. Sold as a pair. 2

Custom Tailored Velour Seat Covers

Manufactured and custom fit exclusively for your Miata. This is not a "one size fits all" seat cover. That is why we carry patterns to cover every Miata. Made from a heavy black colored cloth velour fabric, these covers have a soft and inviting feel. Also included are pockets in the back for storing maps, CDs, etc. Aside from the extra comfort and good looks they provide, these seat covers provide another huge benefit; protection for original upholstery. Supplied as a pair, these covers simply slide over your existing seats. 2

Chrome/Leather Shift Knob

We start out with a chromed knob, then carefully apply leather in your favorite color. Lastly we add the "M" from the Miata script. All of our shift knobs also include a Delrin self tapping bushing. This allows you to firmly tighten the knob while allowing you to orient the "M" in just the position you like.

Appl	Description	Part#	Price
90-05	Blue	906-060	\$29.95
90-05	Black	906-070	29.95
90-05	Red	906-080	29.95
90-05	Yellow	906-090	29.95

Wood Shift Knob & Parking Brake Handle

Add European style to your Miata with these accessories. Because these components are made of Rosewood, there will be a variation in the tone and appearance.

Appl	Description	Part#	Price
90-05	Gearshift Knob	906-110	\$19.95
90-05	Parking Brake Handle	906-120	19.95

TT Style Shift Knob & Brake Handle

Offered as optional equipment by Mazda Europe. Exquisitely made in sporting European style. Supplied in Mazda boxes and handbrake handle includes matching brake release knob.

Appl	Description	Part#	Price
90-05	Shift Knob	916-015	\$59.95
90-05	Brake Handle	916-016	61.95

Carbon Fiber Shift Knob

Styled after the Momo Anatomico, this shift knob has all the style without the price. Finished in black leather and a carbon fiber look. Easily installs in minutes.

Appl	Part#	Price
90-05	906-040	\$29.95

Anyone Can Replace a Shift Knob or Hand Brake Handle

The Miata/MX-5 shift knob simply screws on and off (Brute force is occasionally required). Hand brake handles are tolerance fit and need to be twisted side to side as you pull it off (Brute force is commonly required).

Leather Shift Boot & Parking Brake Handle Cover

Add luxury to your interior with these elegant leather upgrades.

Appl	Description	Part#	Price
90-05	Shift Boot	900-655	\$29.95
90-05	Handbrake Cover- Loose	650-210	24.95
90-05	Handbrake Cover- Snug	650-215	24.95

Leather Shift Boot & Parking Brake Handle Cover NEW!

Add some luxury to your interior with these elegant leather upgrades. Soft and supple fine grain leather is a great improvement to the OEM vinyl. 1

Appl	Description	Part#	Price
06-08	Shift Boot	900-656	\$29.95
06-08	Handbrake Cover	650-220	29.95

Leather Hand Brake Handle NEW!

Mazda seems to have drawn a line at the shifter and didn't give any thought to the hand brake handle. Our black leather hand brake handle with silver bezels, to match the factory, or chrome bezels, for a custom look, finishes the interior off nicely. Installation is straightforward and doesn't require any tools. 1

Appl	Description	Part#	Price
90-05	Chrome Bezels	916-203	\$52.95
90-05	Silver Bezels	916-202	52.95
06-08	Chrome Bezels	904-667	\$55.00
06-08	Silver Bezels	904-668	74.95

Stainless Steel Door Sill Plates

One of the most popular accessories for the Miata is door sill plates. Not only do they look great, they protect a very vulnerable area. Don't suffer another dent or scratch, protect your sills today. 1

Appl	Description	Part#	Price
90-97	Door Sill Plates	648-111	\$39.95

Factory Door Sill Plates

Protect your door sills with a pair of factory sill plates. Plates are highly polished. Proudly feature the Miata logo. 1

Appl	Description	Part#	Price
99-05	Black	971-461	\$124.95
99-02	Tan	971-462	124.95

Factory Door Sill Plates

Protect your door sills with a pair of factory sill plates that proudly feature the MX-5 logo.

Appl	Description	Part#	Price
06-08	Factory Sill Plates	971-465	\$219.95

Hardtop Striker Kit

These strikers are commonly broken when over tightening the hardtop. Don't settle for a rattling hardtop any longer; replace your broken or missing brackets today. If you just bought a hardtop, they are likely missing these crucial brackets.

Appl	Description	Part#	Price
90-05	Striker Kit	904-820	\$52.95

Direct ship orders are shipped right from the manufacturer. The manufacturer will receive your order within 24-48 hours and most items ship within 5 working days. While shipping times are slightly longer, by not stocking these items we can offer lower prices. Orders must be paid in advance by charge card or certified check. Actual shipping charges apply. Direct ship orders do not qualify for free shipping.

Visor Blanking Plates

For many of us, the sun visors in the Miata are more of an obstruction than anything else. If you are like many owners who want to remove the sunvisors but won't because of the unsightly holes left in the header rail, look no further. Moss has created these indestructible ABS visor caps. They install in minutes with a screwdriver. Sold as a pair. 1

Appl	Description	Part#	Price
90-05	Black	901-455	\$15.95
90-05	Chrome	998-260	12.95

Factory Style Bar Covers

Factory style bar covers are offered in a variety of colors. Choose from bright chrome or painted to match your factory color. 1

Appl	Description	Part#	Price
06-08	Chrome	904-515	\$99.95
06-08	Galaxy Grey	904-405	99.95 d
06-08	Winning Blue	904-406	99.95 d
06-08	True Red	904-407	109.95 d

Chrome Style Bar Insert NEW!

Chrome style bar insert plates are a great back drop to the factory style bar. They sit in the recess and back up to the headrests. They're made from stainless steel and then chrome plated. 1

Appl	Description	Part#	Price
06-08	Chrome Inserts - Pair	903-659	\$109.95

Ashtray Cup Holder

Our aftermarket cup holder is a perfect fit for the Miata owner on the go. Textured to match your factory console, cup holder features a rubber mat that fits under the cup holder to catch and retain spills. Install in seconds in place of your factory ashtray.

Appl	Description	Part#	Price
90-97	Cup Holder	222-096	\$15.95

Factory Cupholder

This cupholder is ideal for those who enjoy a Big Gulp.

Appl	Part#	Price
90-97	222-095	\$21.95

Expandable Cupholder

This cup holder is adjustable for various drink sizes, yet still folds neatly out of the way of your shifting. Mounts using existing console screws. No modification needed.

Appl	Part#	Price
90-05	222-091	\$10.45

Cup Holder

Oversized 3 1/4" diameter opening will receive any cup and hold it securely. Sturdily constructed and flocked in Charcoal Grey material to compliment any interior. Best of all, it is secured in place by sliding over the edge of your floor mat so you can use it in any automobile.

Description	Part#	Price
Oversized Cup Holder	100-785	\$22.95

Factory Ashtray

- Removable
- Fits door pocket cup holder
- Convenient
- Genuine Mazda

Appl	Part#	Price
06-08	904-862	\$23.95

Folding Sunshade

Custom fitted to protect your interior and keep it cooler in hot weather. Our durable and convenient sunshield provides superior construction which ensures maximum sun reflection and insulation to reduce heat buildup. Incorporates pre-sewn panels that quickly expand or collapse.

Appl	Description	Part#	Price
90-97	Folding Sunshade	231-850	\$44.95
99-05	Folding Sunshade	231-851	44.95
06-08	Folding Sunshade	231-855	44.95

Trunk Lid Liner

Finish off the underside of your trunk with our logo'd trunk lid liner. It's made from a black automotive grade carpet which also helps eliminate road noise. Available in black with or without logo. 1

TOURIST TROPHY®

Eurosport Wood Rim Steering Wheel

Many Miata enthusiasts have previously owned a British or Italian ragtop. So popular in these classic roadsters was a lot of beautiful wood in the interior. Now it is possible to add the richness and warmth of wood to your Miata's cockpit. Start the process by installing one of our Eurosport wood wheels. We offer two styles of wheel, one with a full rosewood straight grain or a rosewood/leather combination. Both of these wheels utilize your existing airbag. Professional installation highly recommended. 4

Appl	Description	Part#	Price
90-97	A. Wood Rim Wheel	906-100	\$199.95
90-97	B. EuroSport Wheel	906-150	199.95

Colored Leather Steering Wheel Covers

If the look and feel of fine leather is your thing, our leather steering wheel cover is sensational. 1

Appl	Description	Part#	Price
90-97	Black	900-525	\$34.95
90-97	White & Black	900-517	36.95

Wind Stop by Cobalt

Driving your Miata doesn't need to be a hair raising event. The Cobalt wind stop helps eliminate the wind buffeting that takes the fun out of going topless. Now you can have conversations instead of shouting matches. There is no need to remove the wind stop to put the convertible top up or down, it is hinged to effortlessly fold up and down. Quality manufactured using an aluminum frame with a mesh insert, this unit installs in minutes. 1

Appl	Description	Part#	Price
90-05	Mesh Wind Stop	904-151	\$189.95

Windblocker

Keep the wind out of your face and hair with our stylish windblocker. Offering a flush, smooth fit, as well as a low profile design, you can drive in top-down comfort without detracting from the sporty look of your Miata. 1

Miata Chaparral Wheels

The Chaparral S 15's timeless 8-Spoke appearance, paired with its sporty character, is a wheel that truly embraces the Miata's classic styling cues. But don't let the Chaparral's old school good looks and boyish charm deceive you; this wheel was built for business. They are produced in state-of-the-art production facilities, using the latest CAD/CAM manufacturing methods. They are crafted by a low-pressure casting process and specially heat-treated for enhanced strength and durability. The 15" x 7" wheel weighs in at 15.9 lbs., with Miata specific hub center bore (54.1 mm), proper offset (38 mm) and quality that surpasses OEM standards. The Chaparral wheel offers stunning looks at an affordable price. Wheels are sold individually. 1

iPod Integration Module

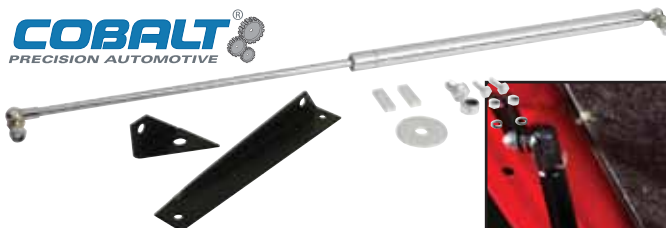

Integrating an iPod into the factory stereo system is a must have these days. Thousands of songs right in the palm of your hand, what more could you want. Now Mazda has finally caught on with their iPod Integration Module. 2

Features:

- Plugs into the Mazda Radio Head Unit
- Mounts neatly out of sight behind the dash (iPod connection is in glove box)
- Connects to any iPod with the docking connector (Gen 3, 4, 5, Mini, Nano, Photo)
- Charges battery while connected

Note: Does not work on Miatas equipped with Sirius Satellite Radio

Appl	Description	Part#	Price
03-07	iPod Module	904-685	\$149.95

Ultimate Hood Lift Kit by Cobalt®

Cobalt's engineers have designed many hood lift kits over the years and were anxious to take on the new MX-5. Being performance enthusiasts and fellow gear heads they knew that this kit needed to do more than just lift the hood. To that end they produced a hood lift kit with a number of features not seen in other kits.

Easy Engine Access – Struts mount near cowl so engine is accessible from the sides without needing to reach around the strut as on other kits.

Progressive Struts – Once hood is opened 8" the struts gently lift it to the fully open position. Other kits use inexpensive linear struts that are either too strong or too weak that cause the hood to raise so fast it comes to a shuddering stop at the top stressing all components or requires you to lift the hood all the way open yourself. 2

Mazda Miata MX-5: Find It. Fix It. Trick It.

This book shows readers how to make the most of any Miata: what to look for in a used model and how to perform common maintenance and repairs, as well as over 15 projects to improve performance and appearance. Focusing on the engine, wheels and tires, suspension, body kits, interior, and more, the projects include full details on required parts, cost, time, tools, and skill necessary for completion. With easy-to-follow directions and clear illustrations, this handy guide is a virtual road map for taking the Miata the full distance. 160 pages paperback.

Mazda MX-5 Miata: The Book of the World's Favourite Sportscar

Here, in definitive detail, is the full story of the MX-5 Miata (known as the Eunos Roadster in Japan) from inception in the early 1980s to the current third generation models. Researched in Japan, this book includes exclusive interviews with key people in the MX-5 story. The book also features a foreword by Takao Kijima, MX-5 Miata's Chief Engineer.

Do it Up! Mazda MX-5 [Miata/Eunos] **NEW!**

Arguably the Mazda MX-5 was single-handedly responsible for the revival of the sports car market, sparking off a new era of convertible fun. Examples of this popular roadster are now plentiful and affordable on the second-hand market. This practical guide provides expert advice on how to breathe new life into a used and perhaps tired example of this modern-day classic. From preventative maintenance, to the renewal of worn components and details of known problems and how to fix them, the clearly written, comprehensively illustrated text provides all the information required to enjoy an MX-5 on a budget.

Heated Blanket	002-842	\$34.95

Car Care

Professional Duster

Specifically engineered to pull dust off paint, the cotton fibers are waxed so you can simply shake the duster out and reuse it. 20" length and includes a protective case.

Pro Duster 231-670 \$14.95

Mini Duster

All the features of a larger duster in a compact package. Wax treated cotton fibers lift dust off surfaces. Simply shake the dust out after every use. Will not scratch or harm your finish.

Mini Duster 231-671 \$9.95

Wheel Cleaning Brush

Designed to get into those hard-to-reach areas of your wheels without breaking your knuckles.

Wheel Brush 386-940 \$8.25

Novus Plastic Polish

#1 polish is for light scratches and aging. #2 polish is for restoring clarity by removing discoloration, haze and fine scratches. The #3 polish removes heavy scratches and abrasions. The #2 polish is required to finish after the #3 polish is used. Perfect for convertible top plastic windows.

#1 Polish- 8oz. 220-605 \$5.95
#2 Polish- 8oz. 220-610 7.95
#3 Polish- 8oz. 220-615 8.95

Connolly Leather Care

Long known for their Hide Food Leather Cream now Connolly has manufactured Leather Cleaner. Made to gently clean more difficult spots on your leather upholstery. In the mean time continue to use Hide Food for monthly maintenance to keep your upholstery soft and supple.

Hide Food 220-210 \$22.95
Leather Cleaner 220-211 26.95

Ragtop Cleaner & Protectant

Ragtop products are designed for ease of use and do not contain any silicone. Will not harm paint, chrome, glass or plastic windows and can be applied in direct sunlight.

Cleaner 221-505 \$9.50
Protectant - Cloth 221-510 16.95
Protectant - Vinyl 221-515 13.95

Auto Dry Blade

11 1/2-inch Water Wand swipes away surface water in minutes.

Auto Dry Blade 001-575 \$19.95

Quixx Paint Care System

Scratch Remover - Unattractive scratches in the paintwork are unavoidable over time. Quixx repair system removes scratches, small marks and scuff marks quickly and reliably from all paint finishes (including metallic). You'll be amazed!

Polish - A high-tech paint care system complete with rust prevention. The 3 in 1 formula cleans and polishes insuring a long lasting paint protection while it fills in minor scratches and flat spots.

Wax - Protects and seals paint for weeks at a time. The formula is concentrated so a little goes a long way. Features long lasting protection and a reflective high gloss finish.

Scratch Remover 056-970 \$19.95
Polish 056-958 19.95
Wax 056-959 19.95

Battery Service

Mini Jumper Cables

Lightweight and easy to handle. Advanced technology copper alloys and space-age cable insulation provide more boosting power than you will ever need. Heat resistance and aging are to UL standards, and the insulation is crack resistant down to -40°F. The cables are small enough to fit in the palm of your hand and are convenient enough to fit in your car's glove compartment or under the seat. Smaller clamps provide a firmer grip and better electrical engagement, while the cable's shape-to-fit construction prevents opposite ends from shorting when connecting the cable to the battery.

Mini Jumper Cables 900-060 \$28.95

Westco 12V31M Battery

Maintenance-free. The new Westco battery utilizes the latest absorbed glass mat technology for more power and reliability. 475 amps, this battery has 30% more cranking amps. The Westco Battery has a slower self-discharge rate for sustained life, perfect for long storage. Terminal location is OEM correct, installation is easy.

Battery 459-390 \$104.95

Note: Air Shipping Rates indicated on page 40 do not apply. Please call 800-642-8295 for UPS Air shipping rates on this item.

On-Board Charger

This is the ultimate way to ensure longer charge life for your battery. This unit is attached to your Miata and is resistant to oil, gasoline, solvent and acid. Operates from any 110V wall outlet.

Charger 386-245 \$55.95

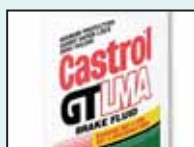

Mazda Miata Touch-Up Paint

Hide little nicks with OEM Mazda touch-up paints. .44 oz. \$6.95 each

Oil Drain Valve

Make oil changes easy with this oil drain valve. Position your oil pan and turn the drain valves lever to the open position.

904-800 \$28.95

PowerPacks by Red Line

Working with multiple engineers and tuners, Red Line developed complete synthetic oil packages specific for the Mazda Miata. Mazda changed the recommended engine oil over the years so Red Line built Miata year specific kits. MTL is supplied for the gearbox for reliability and smoother shifting. The Red Line Oil PowerPacks' benefits include better mileage, more power, smoother shifting, less wear, and lower operating temperatures. Included - Five quarts engine oil, three quarts transmission oil, one quart gear oil, one bottle of WaterWetter, one bottle of SI-1 complete fuel system cleaner, sticker kit, and a hat. Each kit has been tested for compatibility and power gains, and includes enough fluids for a complete oil change.

Synthetic Oil by Red Line

Red Line's synthetic class V motor oils are designed to provide the highest protection, cleanliness and superior drain intervals with the lowest friction. They use the most stable components available and formulate their products for wear protection and friction reduction across a wide range of engine operating conditions. Red Line's products are unique because they contain polyol ester base stocks, the only lubricants that can withstand the tremendous heat of modern jet engines. These synthetics have a natural multigrade property that allows their chemists to avoid bulking up their oils with unnecessary additive packages.

90-99 10W30 904-735 \$9.95

00-04 5W30 904-736 9.95

Foam Filter Cleaning Kit

Keep your foam air filter working properly. This kit is designed to clean and oil foam filters.

Tech Tip: Replacing Your Timing Belt

If your timing belt fails, so can your engine. It is recommended you replace your timing belt at least every 60,000 miles. We offer timing belt kits that include: Timing belt, crank seal, and cam seals. As a further precaution it is best to replace the tensioner, tensioner spring and idler pulley at the same time.

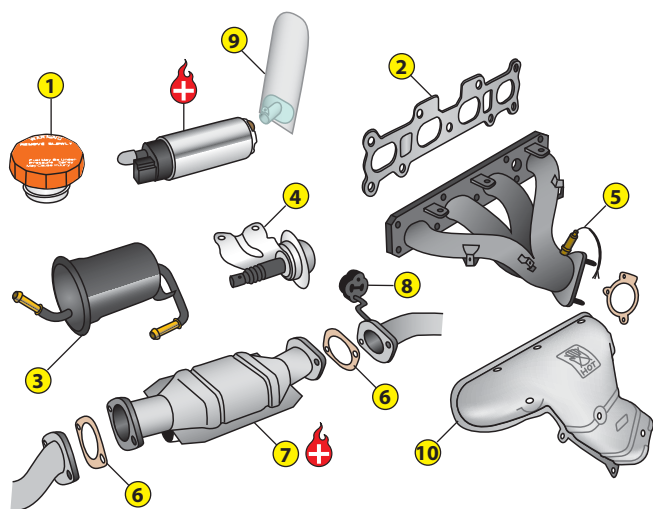

Performance Plug Wires by Jackson Racing

Use the same high quality performance plug wires as many of the top NASCAR Nextel Cup teams! Made exclusively for Jackson Racing, our wires incorporate the JR Logo and script. Check out the extensive list of features:

- Outer sheath made from 8 mm silicone which resists high temperatures and chemicals
- Fiberglass Braid provides superior pull strength
- EPDM layer provides superior insulation to "silicone over silicone" wires
- Polymer Conductive coating protect conductor for better contact
- Monel Conductor for maximum conductivity
- Ferrite impregnated core for superior EMI suppression
- Aramid fibers for superior tensile strength

POWERFLEX

Polyurethane Bushings by Powerflex

Powerflex polyurethane bushings are 25%-30% stiffer than the factory bushings and do not deteriorate in performance over time. The benefit of the increased stiffness is superior control of the suspension components giving you more control over your Miata. See page 24

6	Switch, Brake Light - w/ Cruise	90-97	OE	902-390	1	15.00

When replacing brake rotors and pads, remember: Clean the rotor surface with brake cleaner to remove the oil used for storage; use brake pad "quiet" on the backs of the pads before you install them; and take the cap off the brake reservoir before pushing the pistons back into the calipers.

Tech Tip: Check your fluid level at every oil change to insure it is above the "minimum" level. Change the fluid every two years to insure there are no contaminants or moisture in the fluid. If moisture or contaminants enter the brake system they can ruin it from the inside out.

Moss Motors MP62 Supercharger System

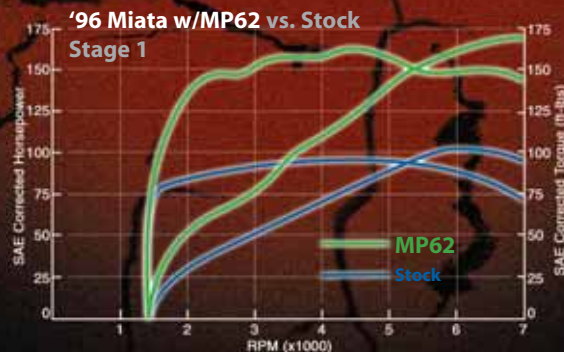

CARB
APPROVED

Miata power fanatics can rejoice, "IT" has arrived. Moss Motors' MP62 based supercharger system was designed for the Miata enthusiast that wants to make serious horsepower and torque with plenty of room available for significant upgrades in power.

The entire system is designed around the Eaton MP62 Supercharger. The MP62 is a roots-type positive displacement blower that delivers instant boost at any RPM. Integrated into the MP62 supercharger is a boost bypass valve. When cruising, the bypass valve opens and re-circulates the air. This allows for fuel economy similar to stock. Put the hammer down and the bypass valve shuts immediately delivering instant boost to your Miata's engine. Every part in this system, including the Eaton supercharger, is warranted by Moss Motors for two years from the date of purchase.

Fuel enrichment and Timing Control under boost is handled by PowerCard. The philosophy is simple - work in harmony with the factory ECU and simply add fuel and adjust timing where necessary and only under boost. This philosophy will quickly become apparent the first time you drive your newly MP62 supercharged Miata. Instant boost, seamless power and no driveability quirks. A steady idle and nothing but a smooth delivery of boosted power that only PowerCard delivers. **See page 6. \$2,995.95**
